Dear Dr. Lakin,

The Office of Laboratory Animal Welfare (OLAW) acknowledges receipt of your September 26, 2019 letter reporting an instance of noncompliance with the PHS Policy on Humane Care and Use of Laboratory Animals at the University of Colorado – Denver. According to the information provided, OLAW understands that a member of the research staff did not provide adequate food and as a result, one mouse died. The IACUC determined that inadequate health monitoring by the animal care staff and by the research staff contributed to the death of the mouse. A letter of reprimand was sent to the PI. It was stated that the animal activity was funded by NIH.

The consideration of this matter by the University of Colorado – Denver was consistent with the philosophy of institutional self-regulation. Similarly, the action taken to prevent recurrence of the issue is appropriate. OLAW assumes that the animal care staff was also appropriately counseled. We appreciate being informed of this matter and find no cause for further action by this office at this time.

Sincerely,

Dear Dr. Morse;

The Institutional Animal Care and Use Committee (IACUC) at the University of Colorado Denver | Anschutz Medical Campus received a report of an animal welfare incident involving the death of one mouse due to no access to food.

Upon investigation by the Office of Laboratory Animal Resources it was determined that a member of the research staff did not provide adequate food.

At a convened meeting of a quorum of the IACUC, a majority of the quorum present determined that the research and care staff failed to monitor adequately animal health. The IACUC determined that a letter of reprimand be sent to the PI. The Committee determined further that the Office of Laboratory Animal Welfare (OLAW) be informed of this incident. (NIH Grant # 2514252)

Please let me know if you require further information.

Sincerely,
