Column E Explanation

Washington Biotechnology, Inc.

6200 Seaforth Street Baltimore, MD 21224

#1 Registration Number: 51-R-0031

#2 Number 3 of animals used in study.

#3 Species (common name) Rabbits of animals used in study.

#4 The rabbits are administered peptide by intravenous injection via the marginal ear vein. Blood samples are taken at several time points after the injection of the peptide by the Auricular Artery or Ear Vein. The rabbits are kept in Restrainers for several hours while bleeds are being performed, without food and water.

#5 Sedation will affect the results of the PK Study.
