Date: 24 March 2014

2.31 (e)(2)

INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).

**Protocol L11209003Q gives an inadequate rationale for the numbers of animals to be used. The principal investigator indicates there will be 70 animals utilized as urine donors to include "10-20 intact adult males, 10-30 intact adult females, 10-15 neutered adult males, 10-15 spayed adult females". The principal investigator also indicates there will be 70 animals utilized as subjects to include 30 adult males and 40 adult females. The protocol indicates a total of 80 animals will be utilized in experiment 1 (70 donors and 70 subjects, with animals used as both donors and subjects when possible). It is unclear whether the total number of animals being utilized including donors and subjects will be a total of 80 animals or 70 + 70 for a total of 140 animals. It is the responsibility of the research facility to ensure that activities involving animals includes a clear and concise rationale for the species and numbers of animals to be utilized in order to promote the health and well-being of the animals as set forth in this section.
