

**Annual Report of Research Facility
Column E Explanation**

1. Registration Number: 48-R-0111 (Xenometrics LLC)
2. Number of animal used in this study: One
3. Species (common name) of animals used in this study: Dog
4. Explain the procedure producing pain and/or distress.

The procedure involved assessing the cardiovascular effects of a pharmaceutical compound, and adverse effects were not expected. However, one animal collapsed and although the animal was immediately attended to by a veterinarian, the animal died before treatment could be administered.

5. Provide scientific justification why pain and/or distress could not be relieved. State methods or means used to determine that pain and/or distress relief would interfere with test results. (For Federally mandated testing, see Item 6 below)

Not applicable, as the protocol included a contingency plan for the treatment of unexpected pain or distress.

6. What, if any, federal regulations require this procedure? Cite the agency, the code of Federal Regulations (CFR) title number and the specific section number (e.g., APHIS, 9 CFR 113.102)

Not applicable.
