According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0579-0036. The time required to complete this information collection is estimated to average 2 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

OMB APPROVED 0579-0036

This report is required by law (7 U.S.C. 2143). Failure to report according to the regulations can result in an order to cease and desist and to be subject to penalties as provided for in Section 2150.

3. REPORTING FACILITY (List all locations where animals were housed or used in actual research, testing, teaching, or experimentation, or held for these purposes. Attach additional sheets if necessary.)

FACILITY LOCATIONS (Sites) See Attached Listing

Number of animals being bred, conditioned, or held for use in teaching, testing, experiments, research, or surgery but not yet used for such purposes.	Number of animals upon which leaching, research, experiments, or lests were conducted involving no pein, distress, or use of pain-relieving drugs.	D. Number of animals upon which experiments, teaching, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which appropriate anesthetic, analgesic, or tranquilizing drugs were used.	E. Number of animals upon which teaching, experiments, research, surgery, or tests were conducted involving accompanying pain or distress to the animals and for which the use of appropriate anesthetic, analgesic, or tranquilizing drugs would have adversely affected the procedures, results, or interpretation of the teaching, research, experiments, surgery, or tests. (An explanation of the procedures producing pain or distress on these animals and the reasons such drugs were not used must be attached to this report.)	TOTAL NUMBER OF ANIMALS (Cols. C+D+E)

Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.

2.) Each principal investigator has considered alternatives to painful procedures.

This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.

The attending veterinarian for this research facility has appropriate authority to ensure the provisions of adequate veterinary care and to oversee the adequacy of other aspects of snimal care and 4.)

> CERTIFICATION BY HEADQUARTERS RESEARCH FACILITY OFFICIAL of Executive Officer (C.E.O.) or Legally Responsible Institutional Official I certify that the above is true, correct, and complete (7 U.S.C. Section 2143). (Chief Exe

Explanation of Animal Totals- 2009

Column E. APHIS Form 7023 Registration Number 33-R-0025/584

Species common name	Number of animals	Procedure	Explanation/Justification why pain/distress could not be relieved	
Dogs	1	Dog used in pre-clinical studies mandated by 21 C.F.R. § 312.23(a)(8)(ii) and 21 C.F.R. § 314.50(d)(2) to gather preliminary safety data of developmental pharmaceuticals.	Presumed unexpected seizure resulting in fatal incident occurred after hours, preventing the use of tranquilizers, analgesics or anesthetics.	
Ferret	1	Ferrets used to test emetic potential of discovery compounds.	Drug administration per study protocol lead to delayed unexpected adverse reaction and death overnight, preventing veterinary intervention.	
Rabbit	1	Rabbit used for training of oral capsule dosing.	Inadvertent dosing accident resulted in death of the animal before intervention was possible.
