Certificate: **57-R-0003**
Site: 003
YERKES REGIONAL PRIMATE
RESEARCH CENTER

Type: FOCUSED INSPECTION
Date: 28-SEP-2020

2.38(f)(1) Critical

Miscellaneous.

Two handling incidents occurred on August 27, 2019, resulting in vole deaths:

A vole developed seizure-like activity after a cage change and died. Internal investigation concluded that trauma sustained during the cage change was likely the cause of death.

A vole was placed in the wrong cage with a different social group. The mistake was identified and the cage was monitored but a vole was found dead with wounds consistent with fighting 2 days later.

Inappropriate handling by the animal care technicians resulted in the death of these 2 Voles.

Handling shall be done as carefully as possible in a manner that does not cause trauma or physical harm.

At the time of inspection, corrective actions and preventative measures had been implemented.

This inspection and exit interview were conducted with facility representatives.

Additional Inspectors:

ELIZABETH PANNILL, VETERINARY MEDICAL OFFICER

Prepared By: STEPHANIE MAYARD
USDA, APHIS, Animal Care
