Inspection Date: 05-APR-18 Site Number: 007

Inspector: THOMAS SECOR, DVM,

Section: _____

3.131(c) SANITATION.

Several pen dividers and gate canes in the KA North Grower/Finishing Building are showing signs of corrosion. No animals are currently being housed in the facility.

Corroded surfaces are difficult to effectively sanitize and may become a source of contamination for animals within those pens. Corrosion may also effect the structural strength of the dividers and gate canes.

Corroded or rusted surfaces in the animal housing areas should be repaired or replaced prior to facility usage and re-introduction of animals into the pens.
