Subject: USDA registration site renewal

Categories: Correspondences

Dear USDA – I am contacting you as a representative of Rutgers University in order to request renewal applications for USDA research units 22-R-0025 and 22-R-0157; both registrations expire in November of this year.

We are interested in combining the two units listed above into a single unit. Do you suggest submitting this proposed combined application in lieu of renewing the two separate units, or renewing the two units first then applying to combine? We are unsure how long (and if) the proposed combined application will take to process and don't want the two individual registrations to expire in the interim. Any guidance you can provide is greatly appreciated.

Sincerely,

(b) (6), (b) (7)(C)
