We lost an NIH supported chimpanzee today. This will be reflected in the monthly census on Dec 1. We have 76 NIH supported animals.

I do not know the cause of death yet. Here is the information on her.

We have a census of 75 NIH-supported animals.

We had a death last week. I will follow up with specifics, clinical and necropsy, once I have them.

Subject: Unimp Census.

Sheri

NIH supported chimpanzee 4x270 died over the weekend, May 18. The animal was found dead by caretakers. The animal had no clinical histories. I will send more detailed information once we have it.

Our census is now 72.

Today Louie, 4X0303 an NIH-supported chimpanzee died. His DOB was 10/1986. Louie had congestive heart disease and was receiving palliative treatment for his condition. We do not have details from pathology at this time but it will likely confirm that his heart disease contributed to his death.
