Humane Endpoints for Nickel 753

Nickel (753) is a 48 year old HCV negative, HBV negative, HIV negative female chimpanzee who has been diagnosed with multiple chronic disease processes by the veterinary staff at APF. The disease processes that Nickel is afflicted with includes chronic renal failure and anemia.

Clearly defined criteria and responsibilities have been agreed upon and the staff trained to observe for decompensation clinical signs. This does not preclude providing supportive therapy as needed, so long as the outcome will involve the possible return of Nickel to an acceptable quality of life in a reasonable amount of time. Humane euthanasia will be performed as required by the veterinarian in attendance.

1. Body weight should be monitored and used as an indicator of a potential debilitating condition. It is recommended that a loss of 25% of body weight within 3 months, a body condition score of 1 or a decrease below 45kg could be an endpoint. Nickel has unresponsive anorexia for 4 days with significant weight loss then euthanasia should be considered.
2. Nickel has chronic renal failure due to hydronephrosis. Her serial blood chemistry analyses show a progressive increase in blood urea nitrogen and creatinine. Possible end stage clinical signs such as persistent vomiting, blindness or disorientation due to increased azotemia should be considered an endpoint. Progressive, severe anemia is a clinical adjunct to chronic end stage renal failure.

It is the consensus of the Alamogordo Primate Facility veterinary staff that due to the grave prognosis associated with these disease processes, Nickel (753) should be humanely euthanized if one or several established endpoints are reached.

CLINICAL PROCEDURES/MAINTENANCE

DATE	PROCEDURE	DATE	PROCEDURE
12-7	No fighting occurred between Alicia and Nickel. Nick-el smells Alicia's butt. Nick-el smells Alicia's butt again. Alicia quickly moves away. Nick-el and Alicia vocalize at each other and stamp their feet then they separate. Phoebe is keeping away from Alicia and Nickel. Nick-el fights with Gretel. between fencing. Phoebe and Alicia come to observe. Nick-el keeps distant from Phoebe and Alicia. Phoebe, Alicia and Nick-el are separated for feeding time. The females are placed back together. The outcome is positive. Females from cage 4 come in when door is opened, and fight with Nick-el between fencing. Females continue to fight and spit. Later, Phoebe jumps off perch to fight between fencing also. Animals appear calm.		Introducing Nickel to Alicia Alicia was introduced to Phoebe. Alicia was the first animal from the group of twelve that was non-aggressive toward Phoebe. Nickel was transferred from Phoebe's old family group to reduce some of Phoebe's stress. Technicians involved: Animal trainer: (b)(6) Enrichment Tech. Animal Care Tech.

Phoebe/Nickel Intro to Cora, Cocoa, Nikita, Muffin 8-16-07

Phoebe/Nickel are locked in 1/3 of den 11 in Bldg (b)(4)
Cora, Nikita, Muffin and Cocoa are in 2/3 of den 11 in BLdg (b)(4)

5 Hours of observations were obtained.

On several occasions Phoebe and Nickel were observed spitting on Cora, Nikita and Muffin through the mesh fencing. They were also observed being spit on by Cora, Nikita and Muffin. They were also observed displaying on the fence toward the group as well as finger fighting through the mesh fencing. This was usually accompanied by yelling by Phoebe and Nickel and the others in the group.

No interaction either negative or positive was observed between Nickel/Phoebe or Cocoa.

No positive interaction was observed between Phoebe/Nickel or Nikita, Cora and Muffin.

9-6-07

Phoebe, Nickel, Toxy intro to Nikita, Muffin, Cocoa

A minimum of 2.5 hours of point sample observations were done on these animals. Phoebe, Nickel, and Toxy are in the 2/3 of den 9. Cocoa, Nikita, and Muffin are in den 10 with access to the 1/3 of den 9 for social interaction.

During my observations I saw no interaction between Phoebe's group and Cocoa or Muffin. I also saw no interaction between Toxy and Nikita's group. During the first few observations I observed several displays between Phoebe and Nikita involving banging/jumping on the mesh between the two groups. After these displays would begin Nickel would always come over to the fence and vocalize. As Nickel would approach Nikita would stop displaying and retreat to another part of her cage.

During one of my last observations (8-30-07) I observed Phoebe and Nikita both sticking their fingers through the mesh at each other. There is double mesh so no actual contact was made. I also observed Phoebe get a mouth full of water and come and sit by the fence but she never spit it toward Nikita.

Enrichment technician: (b)(6)

Location: building (b)(4) den 2

753 Nickel, 1238 Alicia, 1307 Porsha, & 1523 Cleopatra are currently housed with CBO090 phoebe, 1261 Leslie, 1284 Nicole, 1307 Porsha, 1372 Halley, 1496 Marie, 1516 Francis, 1525 Josephina, and 1533 Georgia.

Reason: these four females are beginning reintroduced into there family group after being returned from buildin (b)(4) due to medical purposes.

(DATE: 4-15-03), OBSERVATION PERIOD IS BETWEEN 10:50 A.M. AND 11:15 A.M.
10:50 a.m. during this time the four females waiting to be reintroduced are Nickel, 1238 Alicia, 1307 Porsha, & 1523 Cleopatra. During my arrival Alicia & Cleopatra has been more active than Porsha & Nickel, both Alicia & Cleopatra seem anxious to go outside.

11:01 a.m. during this time the four females are reintroduced, they travel outdoors with there peers as they go out of view.

During the last 8 minutes of the observation period the four females have traveled outdoors, and then I decided to continue my observations outside. As I arrive the four females have traveled into the play yard. Nickel, Alicia, & Phoebe are on the concrete walk of the play yard; Alicia is lounging on her back while Phoebe grooms her abdomen, Nick-el is located at Alicia's feet sitting down being observant to her surroundings. Porsha & Cleopatra are traveling the yard exploring.

11:15 a.m. during this time the group seems calm nothing aggressive has happened up to this point, they have been lounging together and the four females have been accepted well. Also during this time the females have traveled back into the main den area to continue there lounging period.

CHIMPANZEE PERSONALITY TRAIT ASSESSMENT

Chimpanzee personality assessments can be made with this questionnaire by assigning a numerical score for all of the personality traits listed on the following pages. Make your judgments on the basis of your own understanding of the trait guided by the short clarifying definition following each trait. The chimpanzee's own behaviors and interactions with other chimpanzees should be the basis for your numerical ratings. Use your own subjective judgment of typical chimpanzee behavior to decide if the chimpanzee you are scoring is above, below, or average for a trait. The following seven point scale should be used to make your ratings.

1. Displays either total absence or negligible amounts of the trait.
2. Displays small amounts of the trait on infrequent occasions.
3. Displays somewhat less than average amounts of the trait.
- Ø → 4. Displays about average amounts of the trait.
5. Displays somewhat greater than average amounts of the trait.
6. Displays considerable amounts of the trait on frequent occasions.
7. Displays extremely large amounts of the trait.

Please give a rating for each trait even if your judgment seems to be based on a purely subjective impression of the chimpanzee and you are somewhat unsure about it. Indicate your rating by placing a cross in the box underneath the chosen number.

Finally, do not discuss your rating of any particular chimpanzee with anyone else. As explained in the handout accompanying this questionnaire, this restriction is necessary in order to obtain valid reliability coefficients for the traits.

AUTISTIC: Subject often displays repeated, continuous, and stereotyped behaviors such as rocking or self clasping. *on occasion has been observed slapping @ legs*

	1	2	3	4	5	6	7	
least			☒					most

CURIOUS: Subject has a desire to see or know about objects, devices, or other chimpanzees. This includes a desire to know about the affairs of other chimpanzees that do not directly concern the subject.

	1	2	3	4	5	6	7	
least				☒				most

THOUGHTLESS: Subject often behaves in a way that seems imprudent or forgetful.

	1	2	3	4	5	6	7	
least	☒							most

FEARFUL: Subject reacts excessively to real or imagined threats by displaying behaviors such as screaming, grimacing, running away or other signs of anxiety or distress.

	1	2	3	4	5	6	7	
least	☒							most

STINGY/GREEDY: Subject is excessively desirous or covetous of food, favored locations, or other resources in the enclosure. Subject is unwilling to share these resources with others.

	1	2	3	4	5	6	7	
least	☒							most

TIMID: Subject lacks self confidence, is easily alarmed and is hesitant to venture into new social or non-social situations. least most.

	1	2	3	4	5	6	7	
least	☒	☐	☐	☐	☐	☐	☐	most

PLAYFUL: Subject is eager to engage in lively, vigorous, sportive, or acrobatic behaviors with or without other chimpanzees. least most

	1	2	3	4	5	6	7	
least	☐	☐	☐	☒	☐	☐	☐	most

RECKLESS: Subject is rash or unconcerned about the consequences of its behaviors.

	1	2	3	4	5	6	7	
least	☒	☐	☐	☐	☐	☐	☐	most

BULLYING: Subject is overbearing and intimidating towards younger or lower ranking chimpanzees.

	1	2	3	4	5	6	7	
least	☒	☐	☐	☐	☐	☐	☐	most

INNOVATIVE: Subject engages in new or different behaviors that may involve the use of objects or materials or ways of interacting with others.

	1	2	3	4	5	6	7	
least	☐	☐	☐	☒	☐	☐	☐	most

ACTIVE: Subject spends little time idle and seems motivated to spend considerable time either moving around or engaging in some overt, energetic behavior.

	1	2	3	4	5	6	7	
least	☐	☐	☒	☐	☐	☐	☐	most

AFFECTIONATE: Subject seems to have a warm attachment or closeness with other chimpanzees. This may entail frequently grooming, touching, embracing, or lying next to others.

	1	2	3	4	5	6	7	
least	☐	☐	☐	☐	☐	☒	☐	most

AGGRESSIVE: Subject often initiates fights or other menacing and agonistic encounters with other chimpanzees.

	1	2	3	4	5	6	7	
least	☒	☐	☐	☐	☐	☐	☐	most

EXCITABLE: Subject is easily aroused to an emotional state. Subject becomes highly aroused by situations that would cause less arousal in most chimpanzees.

	1	2	3	4	5	6	7	
least	☐	☒	☐	☐	☐	☐	☐	most

CAUTIOUS: Subject often seems attentive to possible harm or danger from its actions. Subject avoids risky behaviors.

	1	2	3	4	5	6	7	
least	☐	☐	☐	☒	☐	☐	☐	most

INQUISITIVE: Subject seems drawn to new situations, objects, or animals. Subject behaves as if it wishes to learn more about other chimpanzees, objects, or persons within its view.

	1	2	3	4	5	6	7	
least	☐	☐	☐	☒	☐	☐	☐	most

PREDICTABLE: Subject's behavior is consistent and steady over extended periods of time. Subject does little that is unexpected or deviates from its usual behavioral routine.

	1	2	3	4	5	6	7	
least	☐	☐	☐	☒	☐	☐	☐	most

DECISIVE: Subject is deliberate, determined, and purposeful in its activities.

	1	2	3	4	5	6	7	
least	☐	☐	☐	☒	☐	☐	☐	most

SENSITIVE: Subject is able to understand or read the mood, disposition, feelings, or intentions of other chimpanzees often on the basis of subtle, minimal cues.

	1	2	3	4	5	6	7	
least	☐	☐	☐	☐	☐	☒	☐	most

IMPULSIVE: Subject often displays some spontaneous or sudden behavior that could not have been anticipated. There often seems to be some emotional reason behind the sudden behavior.

	1	2	3	4	5	6	7	
least	☐	☒	☐	☒	☐	☐	☐	most

DEFIANT: Subject is assertive or contentious in a way inconsistent with the usual dominance order. Subject maintains these actions despite unfavorable consequences or threats from others.

	1	2	3	4	5	6	7	
least	☒	☐	☐	☐	☐	☐	☐	most

CLUMSY: Subject is relatively awkward or uncoordinated during movements including but not limited to walking, acrobatics, and play.

	1	2	3	4	5	6	7	
least	☒	☐	☐	☐	☐	☐	☐	most

ERRATIC: Subject is inconsistent, indefinite, and widely varying in its behavior and moods.

	1	2	3	4	5	6	7	
least	☒	☐	☐	☐	☐	☐	☐	most

ANXIOUS: Subject often seems distressed, troubled, or is in a state of uncertainty.

	1	2	3	4	5	6	7	
least	☒	☐	☐	☐	☐	☐	☐	most

LAZY: Subject is relatively inactive, indolent, or slow moving and avoids energetic activities.

CLINICAL PROCEDURES/MAINTENANCE

DATE	PROCEDURE	DATE	PROCEDURE
9-6-00	Prior to this intro today, Ashlin, Paula, Dana & (Shane) came from Salville 800 East & Phoebe & Rickel came from Walcotts. We opened up lateral door & the animals went to 4/3 side and seemed to be very calm and interactive w/ all w/ each other. No aggression present through the door. We then opened up door to the outside. Phoebe & Rickel (which been) outside for ~ 2 yrs so it was very easy to see them & able to go out. (When) Ginger went out she was excited about something she started barking. All the animals at this time went west up to each other, remaining each other & no aggression present. Ginger & (Shane) and (Paula) went very well. The animal have taken the move and acclimate very well.
