Humane Endpoints for Rudolph 894

Rudolph (894) is a 48 year old HCV negative, HBV negative, HIV negative male chimpanzee that has been diagnosed with multiple disease processes by the veterinary staff at APF. The principle disease process diagnosed is advanced cardiovascular disease. With his current clinical condition, 894 is at high risk for sudden cardiac death.

Clearly defined criteria and responsibilities have been agreed upon by the veterinary staff and the animal care staff trained to observe for decompensation clinical signs. This does not preclude providing supportive therapy as needed, so long as the outcome will involve the return of the animal to an acceptable quality of life in a reasonable amount of time. Humane euthanasia will be performed as required by the veterinarian in attendance.

1. Body weight should be monitored and used as a current potential indicator a debilitating condition. It is recommended that a loss of 20% of body weight within 3 months, a body condition score of 1 or a decrease below 45kg could be an endpoint. If the animal has unresponsive anorexia for 4 days with significant weight loss then euthanasia should be considered.
2. Rudolph has been evaluated by the veterinary staff at APF. His advanced cardiovascular disease puts him at high risk for sudden death. While these conditions are being medically managed, none of these treatments are curative. Signs of advanced cardiac failure such as advanced exercise intolerance or respiratory distress should be considered a potential endpoint.
3. It is the consensus of the Alamogordo Primate Facility veterinary staff that due to the grave prognosis associated with the advanced disease processes, Rudolph (894) should be humanely euthanized if one or several established endpoints are reached.

 Gosam Relocate to Lavelle Bldg 800 - cage 5-
 Acclimation next to Lil Soulan 830, Harry 1283, Pete 955, Al 860, Roudolph 89.

DATE	PROCEDURE	DATE	PROCEDURE
12-7-99	Today we brought Gosam from Halliman to Lavelle. He was put in Y3 side of cage 5 next to Lil Soulan, Harry, Pete, Al, & Roudolph for acclimation period. When Gosam was put in the Y3 side, he went immediately to the perch where housed windows is. Harry, Pete, & Roudolph were @ their house windows on Y3 side. Positive gestures were being made by all animals. Especially Pete when he saw Gosam laughing & playful actions were presented. Harry was joining in all the animals came up to greet Gosam through double window. Pete did play the hole time during my obs. @ this point everything looks real positive.	in 2/3 side. Lil Soulan present, display kicking door, hitting wall. Went to Hardy window, peered in for a second. Doesn't seem real interested. More interested in us and animals across from us. Opened to Gosam first to order 2/3 side to Lil Soulan. Display between Gosam & Lil Soulan for a short moment. Then Lil Soulan backed off. Gosam so far is holding his own. He scuffle broke out between Lil Soulan & Gosam. Pete intervened and took up for Gosam. Gosam & Lil Soulan on perch checking each other out and growled for a short time. This seem to upset Pete. So when Pete & Gosam passed each other they began a brief upset. But resolved and they began to groom each other. All three Pete, Gosam & Lil Soulan sitting in middle of floor grooming each other.	
1-25-00	Today we are going to give Gosam to the group. During the last month & 1/2 positive interaction of have been seen between them thru the Hardy window. We will start @ Pete. Pete went to Y3 side. Gosam being and presented to Pete. They stood up right and then both turned around and presented their anal bottom to each other. A small spat Pete retreated for a small moment. Then they resumed in positive presenting to each other. Pete grooming Gosam & Gosam returning the procedure. They continued to groom each other and inspecting every part of each other. During this time we closed them in Y3 side and let Lil Soulan	Went out Harry in Y3. Gosam to be exposed to join group. Harry entered 2/3 side and presented to Gosam. Lil Soulan went to Gosam's defense. Lil Soulan & Pete went to Y3 and Harry stayed in Y3. Now all 4 in Y3 side. Harry & Gosam still haven't interacted positively to each other yet. Harry seems to be ignoring Gosam. Al in Y3 side, other 4 in 2/3. Al & Gosam positive interaction in Hardy window.	

Larry tried to start a Joam again but Lil' Soreon + Pete come between them. Larry keeps challenging Joam but the other two will not let anything happen. Joam is also keeping his stand in him.

Grooming cont in Pete + Joam, Lil' Soreon keeping a reticence. But Lil' Soreon + Pete really seem to like Joam a lot.

A minor abrasion on Larry's ^{side of} foot by leg tree opened up 1/3 all 4 went in + Al. No problems.

Joam is walking among them all. Al is wanting to play + Joam. Joam playing + Al. Doing real well. All five animals playing follow the leader and doing well.

Rudolph put in 1/3 side.

Joam checking out Rudolph thru window. Pete goes to Joam and begins grooming.

Al doesn't seem to care about the new group members.

No other challenges between Larry + Joam. They are all checking out each other + pacing around den stopping for moments to greet each other.

Opened up 1/3 side Rudolph entered. A lot of vocalization going on. A slight fight between Pete + Al but ended quickly.

All is quiet @ this point.

Pete is staying the closest to Joam thru the entire intro. They seem to be calming down and accepting the sit the party very well.

They are all interacting and playing right before feeding. All small abrasions on backs. Lil' Soreon + Pete seem to like Joam a lot.

CHIMPANZEE PERSONALITY TRAIT ASSESSMENT

Chimpanzee personality assessments can be made with this questionnaire by assigning a numerical score for all of the personality traits listed on the following pages. Make your judgments on the basis of your own understanding of the trait guided by the short clarifying definition following each trait. The chimpanzee's own behaviors and interactions with other chimpanzees should be the basis for your numerical ratings. Use your own subjective judgment of typical chimpanzee behavior to decide if the chimpanzee you are scoring is above, below, or average for a trait. The following seven point scale should be used to make your ratings.

1. Displays either total absence or negligible amounts of the trait.
2. Displays small amounts of the trait on infrequent occasions.
3. Displays somewhat less than average amounts of the trait.
- ✗ → 4. Displays about average amounts of the trait.
5. Displays somewhat greater than average amounts of the trait.
6. Displays considerable amounts of the trait on frequent occasions.
7. Displays extremely large amounts of the trait.

Please give a rating for each trait even if your judgment seems to be based on a purely subjective impression of the chimpanzee and you are somewhat unsure about it. Indicate your rating by placing a cross in the box underneath the chosen number.

Finally, do not discuss your rating of any particular chimpanzee with anyone else. As explained in the handout accompanying this questionnaire, this restriction is necessary in order to obtain valid reliability coefficients for the traits.

AUTISTIC: Subject often displays repeated, continuous, and stereotyped behaviors such as rocking or self claspings.

	1	2	3	4	5	6	7	
least								most
	☐	☐	☒	☐	☐	☐	☐	

CURIOUS: Subject has a desire to see or know about objects, devices, or other chimpanzees. This includes a desire to know about the affairs of other chimpanzees that do not directly concern the subject.

	1	2	3	4	5	6	7	
least								most
	☐	☐	☐	☒	☐	☐	☐	

THOUGHTLESS: Subject often behaves in a way that seems imprudent or forgetful.

	1	2	3	4	5	6	7	
least								most
	☐	☐	☐	☐	☒	☐	☐	

FEARFUL: Subject reacts excessively to real or imagined threats by displaying behaviors such as screaming, grimacing, running away or other signs of anxiety or distress.

	1	2	3	4	5	6	7	
least								most
	☐	☐	☐	☐	☒	☐	☐	

STINGY/GREEDY: Subject is excessively desirous or covetous of food, favored locations, or other resources in the enclosure. Subject is unwilling to share these resources with others.

	1	2	3	4	5	6	7	
least								most
	☐	☐	☐	☐	☒	☐	☐	

TIMID: Subject lacks self confidence, is easily alarmed and is hesitant to venture into new social or non-social situations. least most.

	1	2	3	4	5	6	7	
least								most
	☐	☐	☐	☒	☐	☐	☐	

PLAYFUL: Subject is eager to engage in lively, vigorous, sportive, or acrobatic behaviors with or without other chimpanzees. least most

	1	2	3	4	5	6	7	
least								most
	☐	☒	☐	☐	☐	☐	☐	

RECKLESS: Subject is rash or unconcerned about the consequences of its behaviors.

	1	2	3	4	5	6	7	
least								most
	☐	☐	☒	☐	☐	☐	☐	

BULLYING: Subject is overbearing and intimidating towards younger or lower ranking chimpanzees.

	1	2	3	4	5	6	7	
least								most
	☐	☐	☒	☐	☐	☐	☐	

INNOVATIVE: Subject engages in new or different behaviors that may involve the use of objects or materials or ways of interacting with others.

	1	2	3	4	5	6	7	
least								most
	☐	☐	☒	☐	☐	☐	☐	

ACTIVE: Subject spends little time idle and seems motivated to spend considerable time either moving around or engaging in some overt, energetic behavior.

	1	2	3	4	5	6	7	
least								most
	☐	☐	☒	☐	☐	☐	☐	

AFFECTIONATE: Subject seems to have a warm attachment or closeness with other chimpanzees. This may entail frequently grooming, touching, embracing, or lying next to others.

	1	2	3	4	5	6	7	
least				☒				most

AGGRESSIVE: Subject often initiates fights or other menacing and agonistic encounters with other chimpanzees.

	1	2	3	4	5	6	7	
least		☒						most

EXCITABLE: Subject is easily aroused to an emotional state. Subject becomes highly aroused by situations that would cause less arousal in most chimpanzees.

	1	2	3	4	5	6	7	
least		☒						most

CAUTIOUS: Subject often seems attentive to possible harm or danger from its actions. Subject avoids risky behaviors.

	1	2	3	4	5	6	7	
least				☒				most

INQUISITIVE: Subject seems drawn to new situations, objects, or animals. Subject behaves as if it wishes to learn more about other chimpanzees, objects, or persons within its view.

	1	2	3	4	5	6	7	
least				☒				most

PREDICTABLE: Subject's behavior is consistent and steady over extended periods of time. Subject does little that is unexpected or deviates from its usual behavioral routine.

	1	2	3	4	5	6	7	
least	☐	☐	☐	☒	☐	☐	☐	most

DECISIVE: Subject is deliberate, determined, and purposeful in its activities.

	1	2	3	4	5	6	7	
least	☐	☐	☐	☒	☐	☐	☐	most

SENSITIVE: Subject is able to understand or read the mood, disposition, feelings, or intentions of other chimpanzees often on the basis of subtle, minimal cues.

	1	2	3	4	5	6	7	
least	☐	☐	☒	☐	☐	☐	☐	most

IMPULSIVE: Subject often displays some spontaneous or sudden behavior that could not have been anticipated. There often seems to be some emotional reason behind the sudden behavior.

	1	2	3	4	5	6	7	
least	☐	☐	☒	☐	☐	☐	☐	most

DEFIANT: Subject is assertive or contentious in a way inconsistent with the usual dominance order. Subject maintains these actions despite unfavorable consequences or threats from others.

	1	2	3	4	5	6	7	
least	☐	☒	☐	☐	☐	☐	☐	most

CLUMSY: Subject is relatively awkward or uncoordinated during movements including but not limited to walking, acrobatics, and play.

	1	2	3	4	5	6	7	
least				☒				most

ERRATIC: Subject is inconsistent, indefinite, and widely varying in its behavior and moods.

	1	2	3	4	5	6	7	
least		☒						most

ANXIOUS: Subject often seems distressed, troubled, or is in a state of uncertainty.

	1	2	3	4	5	6	7	
least		☒						most

LAZY: Subject is relatively inactive, indolent, or slow moving and avoids energetic activities.

	1	2	3	4	5	6	7	
least			☒					most

DISORGANIZED: Subject is scatterbrained, sloppy, or haphazard in its behavior as if not following a consistent goal.

	1	2	3	4	5	6	7	
least				☒				most

UNEMOTIONAL: Subject is relatively placid and unlikely to become aroused, upset, happy, or sad.

	1	2	3	4	5	6	7	
least		☒						most
