Re: Annual Report of Research Facility for 2019-2020

Dear Dr. Goldentyer,

This letter is to provide notice of an exception to the AWA regulations and standards by Elanco in this fiscal year.

Leptospirosis dogs on study were approved for an exception to the 14-day sanitization of enclosures by our Ethical Committee to maintain biocontainment for human safety reasons. Enclosures were still provided daily washdowns during this twenty-seven (27) day duration for two studies.

If you should have any questions or concerns, please feel free to contact me.

Respectfully,

(b) (6) [Redacted]
