

## USNPRC Category E Explanation 2020

Registration Number:

57-G-0001

Customer Number:

334023

Species	Number	Procedure Causing Pain/Distress	Explanation
ARS Birds	288	Inoculation with avian influenza virus or Newcastle disease virus	Poultry challenged with a virus develop ocular/nasal discharge, sneezing, difficult breathing, and facial swelling. Natural progression of the disease, in the absence of treatment with antivirals or analgesics, is required in order to evaluate the protection of candidate vaccines and the transmission of the virus.
