

Texas Heart Institute, Registration no. 74-R-0037 / 1478
Attachment to 2020 Annual Report to USDA

A total of 6 calves and 3 sheep on 3 separate IACUC-approved protocols were confined to a stanchion for the minimum period of time necessary to accomplish the objectives of the approved research protocols, sometimes exceeding 24 hours, in order to provide proper care during the post-operative period, and to prevent harm to the animal during this period. The IACUC reviewed and approved the explanation and justification for “extended restraint” in each of these protocols.
