USDA Customer No.: 322590 – Nittobo America Inc.

Dear Sir or Madam,

We have a question for the use of cloned animals for commercial purpose (not for food purpose). We manufacture raw material for In-vitro-diagnostic or analyte specific reagent from goat blood and want to use the cloned goat for commercial purposes if it can produce useful antisera. Therefore, we are wondering if we are allowed to do it and any license or certificate is needed for this purpose. We currently have Class R Research Facility and Class B dealer license.

Thank you very much in advance for your response in this matter.

Best Regards,

(b) (6), (b) (7)(C)
