Section: _____

2.31(b)(3)(ii) INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).

The non-affiliated member of the IACUC is intended to represent the general community interests in the proper care and use of animals and should not be a current or former laboratory animal user at any other institution. A new non-affiliated community member needs to be appointed to the IACUC.

Section: _____

3.31(a)(4) SANITATION.

Cloudy opaque residue was present on the surfaces of many of the occupied primary enclosures. The residue resulted either from the use of too much soap in the mechanical washer or from incomplete rinsing after the wash cycle. The residue impairs the visualization/observation of the animals housed inside, may indicate incomplete sanitization, and needs to be addressed.
