Subject: Arizona Chimps

Greetings Dr. Murphy,

I got your email from Rachel Haller (who I was referred to by Dr. Buchl from UT MD Anderson).

I direct the UC Davis Coccidioidomycosis Serology lab. We occasionally receive samples from chimps housed at the Primate Foundation of America (c/o UT MD Anderson Cancer Center).

After going back through the historical data, an interesting story emerged about coccidioidomycosis in primates that should probably be published – we just need a bit more demographic data and clinical history for the tested animals. I'd be glad to include you as an author. Might you have a few minutes to discuss by phone?

Thanks for your time,

Ian H. McHardy PhD, D(ABMM)
Assistant Professor & Director, Coccidioidomycosis Serology Lab

Subject: Re: Arizona Chimps
Attachments: Cocci Data - Females.xls; Cocci Data - Males.xls; Cocci Treatments.xls; PFA Master Inventory.xls

I have attached four files for you to look at. This is a brief description of each:

PFA Master Inventory - This is a list of all the chimpanzees that were ever owned by (or housed at while on loan) the Primate Foundation. This will give you the total number of males and females. You'll see that there are some that died at or during birth. Age at death is shown. There was one set of male twins born that are shown as one individual. Both died at birth.

Cocci Treatments - This file will give you information on individuals, titers, and treatments. There is a different sheet for each drug used.

Cocci Data Females and Cocci Data Males - These files provide specific titer information and test dates, but also includes cocci vaccination dates. I am trying to find more information about the vaccine itself. In the same column as the vaccine data are some cryptic notes about treatments. You'll see abbreviations for INI and END (initiated and ended), and also abbreviations for the drugs TR-R3 is treated with Bay R, TR-K is treated with ketoconazole, TR-VC is treated with vitamin C. We gave all the chimps 1000 mg vit c daily as part of their normal diet. When they were on cocci treatment or if they had a titer of 1:4 or higher, we increased their daily vitamin c to 2000 mg. I think these two files were set up specifically to track cocci vaccine information. I hesitated to send these two files because I noticed that some of the treatment information is missing. If you look at the female, Dahpi, there is no treatment information other than vit c listed. If you look at her sheet on the Cocci Treatments file it will show she was treated with several different drugs. If you find other discrepancies, give me a call or send me a list and I can dig into the individual animal records to get the facts straight.

I hope this helps!
Jim

Jim,

No worries - Appreciate the effort! Thanks so much.

Ian

Hi Dr. McHardy,

It has taken me too long, but I have a little bit of time to start digging through the old PFA files. I think I have a pretty good start at sorting out cocci records from the chimps that were at PFA. The records are a little less clear than I remember but I'll get you all I can.

I'll send some records soon to make sure what I'm pulling is of value to you.

Jim

Jim,

This is an amazing amount of work – definitely exceeds expectations! I can't thank you enough for compiling all of this! I will this over with George Thompson (codirector of the Center for Valley Fever) and get back to you if we have any questions.

Will follow up soon regardless.

Kind regards,

Subject: Re: Arizona Chimps

I have attached four files for you to look at. This is a brief description of each:

PFA Master Inventory - This is a list of all the chimpanzees that were ever owned by (or housed at while on loan) the Primate Foundation. This will give you the total number of males and females. You'll see that there are some that died at or during birth. Age at death is shown. There was one set of male twins born that are shown as one individual. Both died at birth.

Cocci Treatments - This file will give you information on individuals, titers, and treatments. There is a different sheet for each drug used.

Cooci Data Females and Cocci Data Males - These files provide specific titer information and test dates, but also includes cocci vaccination dates. I am trying to find more information about the vaccine itself. In the same column as the vaccine data are some cryptic notes about treatments. You'll see abbreviations for INI and END (initiated and ended), and also abbreviations for the drugs TR-R3 is treated with Bay R, TR-K is treated with ketoconazole, TR-VC is treated with vitamin C. We gave all the chimps 1000 mg vit c daily as part of their normal diet. When they were on cocci treatment or if they had a titer of 1:4 or higher, we increased their daily vitamin c to 2000 mg. I think these two files were set up specifically to track cocci vaccine information. I hesitated to send these two files because I noticed that some of the

treatment information is missing. If you look at the female, Dahpi, there is no treatment information other than vit c listed. If you look at her sheet on the Cocci Treatments file it will show she was treated with several different drugs. If you find other discrepancies, give me a call or send me a list and I can dig into the individual animal records to get the facts straight.

I hope this helps!

Hi Dr. McHardy,

It has taken me too long, but I have a little bit of time to start digging through the old PFA files. I think I have a pretty good start at sorting out cocci records from the chimps that were at PFA. The records are a little less clear than I remember but I'll get you all I can.

I'll send some records soon to make sure what I'm pulling is of value to you.

Hello,

In the **Cocci Data Females** and **Cocci Data Males files**, there are columns for "INNOC. DATE" and "INNOC. DOSE." There we have listed the vaccination information. It gets confusing because at some point, someone added information about treatments as well. I highlighted that in the email below but it is confusing to look at and try to sort out what is vaccination and what is a treatment. Attached is a Snip of Tody's sheet in the Cocci Data – Females file. I highlighted the cocci vaccinations. They are all recorded in a similar way across the sheets. Unfortunately, I have not yet found the information on the specific vaccine. I'll keep digging for that. There may have been more than one, I'm not sure. I do think I remember one that was "rather old" and had US Naval Research or something similar on the label. Dr. Pappagianis may have some notes available? I see some correspondence with him about a vaccine but no specifics.

If my explanation about the spreadsheet columns is confusing (I think it may be) don't hesitate to give me a call. Hopefully, I can give a little better explanation that way.

Hello,

Is there anything I need to do with this notification? It says PP959384 will expire in 11 days but I think it already expired on 4/30/2019.

I created a new order that started on 5/1/2019. The new PP# is 1032529.

Thanks,
Jim

Subject: RE: Pp 959384 / bpo31137 Protatek Coccidioidomycosis (Valley Fever) testing standing order renewal testing for animals in Arizona and animals from Arizona quarantined in Seattle

Hi Erik,

I just submitted the new PP order for Pharmgate. There was not a re-order option so I just created a new order. I checked the numbers and took into account the animals coming in from NIRC which will be tested on a semi-annual basis, same as the current population.

Subject: Pp 959384 / bpo31137 Protatek Coccidioidomycosis (Valley Fever) testing standing order renewal testing for animals in Arizona and animals from Arizona quarantined in Seattle

Hi Jim,

This standing order renewal is due 4/2019, can you please solicit a new quote and create a new Pp exactly like the current one? You might be able to use the re-order function and the info will populate automatically. I'm not sure if that works for standing orders but let me know if it does.

Can you please review the estimate? It appears we have only used about \$11k of the \$25k estimate.

Thank you,

Erik Sheker

Hi Dr. McHardy,
I was wondering if you would be attending the Cocci Study Group meeting this week. One of our veterinarians, Tess House, will be at the meeting. If you are there, I hope that you two would have the chance to say hello.
Sincerely,
Jim

Subject: cocci submission forms

Can you check if the cocci submission forms that are scanned, are accurate? I have an invoice for 28 tests. The first one is T00237, who is the only one on the requisition form for 3/6. There should be 27 more but the next form only has one listed as well.

Thanks,
Jim
