Type: ROUTINE INSPECTION
Date: 14-SEP-2021

2.131(b)(1) Critical

Handling of animals.

At the time of inspection, the facility informed the inspectors of an incident, on 9/29/20, in which a nonhuman primate on study accidentally had test article administered into it's lungs rather than it's stomach. Although a staff veterinarian and RVT were able to examine the animal almost immediately after the incident, the animal was not able to be saved. The facility has taken appropriate action to prevent recurrence.

Handling of all animals shall be done as expeditiously and carefully as possible in a manner that does not cause trauma, overheating, excessive cooling, behavioral stress, physical harm, or unnecessary discomfort.

Corrected by the time of inspection

This inspection and exit interview were conducted with Facility Representatives.
