RE: Annual Report  
Certificate: 21-R-0021  
Fiscal Year: 2021  
Customer ID Number: 294

Dear USDA APHIS Animal Care,

We have several bat protocols where there is an exception approved by the IACUC under 9 C.F.R. § 2.38(k) that is not provided for under the AWA regulations and standards. This exception allows the extension of interval for cleaning/sanitization of cages for bats during their mating and subsequent birth season to prevent pups from being separated from their mothers. The extension is for a period of 90 days and is supported by published research. The total number of bats this effected in the report period was 170.

Sincerely,

(b) (6), (b) (7)(C)

Interim Director, IACUC Office
