

## **Exceptions and Exemptions**

The PI, with advice of the attending veterinarian, requested and the IACUC approved permission to house 1-3 day old piglets in the PI's laboratory for up to 48 hours to allow the laboratory staff to continually monitor and feed the piglets. A total of 6 piglets were covered by this exception. While the protocol exemption was approved, all 6 piglets were used acutely and were not housed in the lab for 48 hours.

Note: All USDA exceptions are reviewed by the IACUC during semiannual inspections of laboratories and facilities.
