

Miami University – Ecology Research Center

2020 Exception to the Guide and AWA: IACUC Approved

For research conducted in large field based enclosures: Daily checks have been approved to waive visual observation of individual animals (voles). Any observations of animals in distress will be noted along with issues with the integrity of the enclosures and habitat. Integrity of the enclosure to be restored immediately and protocol PI notified. Population size and density will be monitored using mark-and-recapture techniques as part of the normal research activities.
