FY21 Exceptions to the Annual Report

Species: Dogs

Number of Animal Affected: 32

Brief Description of Deviation to AWA:

An IACUC-approved exception to the requirement to sanitize primary enclosures at least every 2 weeks was provided due to use of a human zoonotic pathogen which has an increased risk of exposure to personnel if animals were moved during the sanitization procedure. Daily washdowns below the enclosure were performed using a modified technique and enclosures spot cleaned daily to reduce staff risk for exposure for a total of 19 days.

Species: Cats

Number of Animals Affected: 30

Brief Description of Deviation to AWA:

An IACUC-approved exception to the requirement to sanitize primary enclosures at least every 2 weeks was provided due to use of a human zoonotic pathogen with risk to employees during any handling of the animals. Enclosures were dry spot cleaned in addition to a modified process for litter cleaning and change out that allowed a safe distance of staff from the enclosures for 83 days.
