

Column E Explanation USDA 2021

#1) Registration Number: 51-R-0031

#2) Washington Biotechnology, Inc.

6200 Seaforth Street, Baltimore, MD 21224

#3) Number of animals used in study 42.

#4) Species (common name) Rabbits of animals used in study.

#5) Rabbits were sedated with a ketamine/xylazine cocktail during intra-articular injections. But, could not be given anything for pain relief after MSU crystals or CPPD crystals injections.

#6_ Administering pain relieving or edema relieving medications would alter the ability to collect pertinent data for pain measurements and/ or knee diameters for these animal models. However, rabbits are euthanized immediately at the end of the study.
