Re: Animal Welfare Assurance
A3368-01 [OLAW Case 110]

Dr. Nadine Connor
Associate Vice Chancellor
for Research Policy and Compliance
University of Wisconsin-Madison
(b) (4) Bascom Hall – 500 Lincoln Drive
Madison, WI 53706

Dear Dr. Connor,

The Office of Laboratory Animal Welfare (OLAW) acknowledges receipt of your September 20, 2021 letter reporting an adverse event at the University of Wisconsin-Madison following up on an initial September 3, 2021 notification by telephone.

According to the information provided, this Office understands that the University of Wisconsin-Madison Animal Care and Use Committee (ACUC) determined that an adverse event occurred with respect to: a nonhuman primate that sustained an injury to its hand within its enclosure. The final report states an adult macaque was discovered with its left hand caught between a perch and the wall while housed in its enclosure. In response, the animal was extricated and required amputation of two digits on the left hand. Appropriate antibiotics, anti-inflammatories, and analgesics were administered as treatment and the healing process was monitored. Investigative results revealed the perch's wall anchors were failing and have been repaired. It is understood that shop personnel are currently evaluating the anchors in all the pens to prevent future recurrence.

It is noted the animal is supported by PHS funding. Based on its assessment of this explanation, OLAW understands that the University of Wisconsin-Madison has implemented appropriate measures to correct and prevent recurrences of these problems.

We appreciate being informed of these matters and find no cause for further action by this Office.

Sincerely,
Jacquelyn T.

Dear Dr. Morse:

The University of Wisconsin-Madison, in accordance with Assurance A3368-01 and PHS Policy IV.F.3, provides this report of an incident first reported to you via telephone by Dr. Janet Welter on September 10, 2021.

In this incident, an adult macaque was found in its enclosure with its left hand caught between a perch and the wall. The animal was extricated and subsequently required amputation of two digits on the left hand. The animal was treated with appropriate antibiotics, anti-inflammatories, and analgesics and the healing process is being monitored closely. On further investigation, it was determined that the perch's wall anchors were failing. The anchors were repaired and shop personnel is in the process of evaluating the anchors in all of the pens to ensure that a similar event does not recur. The animal involved was supported by PHS funds.

The LSVC ACUC discussed this incident in full committee and determined that the corrective steps taken were appropriate. If you have further questions, please feel free to contact either of us or Dr. Janet Welter.

Sincerely,

(b) (6)

Ricki Colman, Ph.D.
Chair, LSVC ACUC
