B. APPROVAL OF MINUTES OF PREVIOUS MEETING

Presentation and review of the meeting minutes of December 09, 2020.

Action: the minutes were approved as written.

C.2. Reports

Change in Institutional Official

20-086-APU

One guinea pig was euthanized on 12/22/2020 at the recommendation of veterinary personnel.

Action: the IACUC determined no additional actions were necessary.

Protocol Expiration Report

18-003-IAU expired on 12/09/2020. Animals were transferred to Holding on 12/08/2020.

18-012-HICB expired on 01/02/2021. Animals were transferred to Holding on 12/21/2020.

D. DCM REPORT

HVAC issues in a satellite facility were corrected last week.

Planned power outages in a research building are scheduled later this month. DCM is working with PIs of satellite facilities to make sure life support systems maintain power during these events.

Planned renovations in a research building will begin later this year. DCM leadership is involved in preparations to minimize the effects of building renovations on animal facilities.

One of the basic science departments reported many PIs have experienced issues within their mouse breeding colonies. The AV responded by researching the facility records and working with individual PIs to address their concerns.

Facility renovations to re-establish a rodent ABSL-3 area are scheduled for completion next month.

C. REPORT FROM THE CHAIR

C.1. IACUC Training

NABR Webinar: the 2020 USDA Oversight Process

C.2. Reports

Meeting Location Update: In-person IACUC meetings will resume starting next month

19-082-SCHI

DCM veterinary staff identified mice exhibiting ocular abnormalities on 04/21/2021. Consultation with protocol associates revealed all animals underwent a blood collection procedure that was not described in the approved protocol. The PI agreed to halt all unauthorized procedures immediately, and an amendment describing the procedure was submitted the following week. Protocol associates also committed to seek additional training on this procedure before attempting to perform this procedure again.

Action: the IACUC determined no additional actions needed at this time.

Protocol Expiration Report

18-045-SAPHL expired on 05/01/2021; animals were transferred to Holding on 04/29/2021.

B. APPROVAL OF MINUTES OF PREVIOUS MEETING

Presentation and review of the meeting minutes of June 09, 2021.

Action: the IACUC approved the minutes as written.

C. REPORT FROM THE CHAIR

C.1. IACUC Training

Lab Animal 32(8) Protocol Review: The Case of the (Over) Zealous IACUC Member

C.2. Reports

Changes to IACUC membership and consultation were announced.

UPDATE: 19-063

The IACUC held a discussion on humane endpoints for aging/longevity studies, and authority of the AV during its last meeting. On 06/10/2021, representatives from the IACUC and DCM met with the PI. In response to this meeting, the PI submitted an amendment to clarify humane endpoints for longevity cohorts.

Action: the IACUC determined no additional actions necessary.

18-052

Mice were transferred to Holding on 05/17/2021. On 06/10/2021 and 06/14/2021, the remaining mice (5 cages) were euthanized by research team members. The AV informed the PI that the research team are not authorized to work with animals assigned to the Holding protocol.

Action: the IACUC determined no additional actions necessary.

20-041

A goat underwent a surgical procedure on 06/17/2021 that could not be completed as described in the AUP due to a material sterilization error. The animal recovered from the minor surgical procedure uneventfully, and the AV promptly reported the incident. The issues regarding the implant were addressed, and the same animal underwent the full surgical procedure without incident on 07/01/2021.

Action: the IACUC determined no additional actions necessary.

Protocol Expiration Report: no events to report this month

D. DCM REPORT

Update: the Xenopus satellite facility has permanently closed.

A power outage occurred in a research building on 07/07/2021. Power was reinstated to the building's animal facility quickly, with no negative impacts to animals.

Update: DCM continues to receive concerns from PIs with mouse breeding colonies. The AV and facility manager plan to work with the PIs individually to address their concerns.

E. PROTOCOLS

E.1. Withdrawn Protocols

E.2. Previously Reviewed Protocols with No Response

301832

This submission was administratively withdrawn following the meeting, on 07/15/2021.

Protocol Expiration Report

21-022

A protocol deviation was observed by DCM personnel on 07/29/2021. The research team responded by promptly transferring animals to the appropriate AUP.

Action: the IACUC determined no additional actions necessary.

18-046 and 19-050

Since 05/2021, the research team continued to generate animals without IACUC approval for additional animals. During this time, the PI utilized the Holding protocol beyond the timeframe allowable under IACUC policy. The PI also has a history of reporting inaccurate animal usage data to the IACUC under a previous AUP. At the time of this meeting, the PI was in the final stages of securing IACUC approval for additional animal numbers.

Action: the IACUC determined no additional actions necessary.

D. DCM REPORT

A campus building housing an animal facility experienced issues with steam management last month. The issues were resolved without any negative impact to the animal facility or animal well-being.

A campus building housing an animal facility experiences issues with HVAC management last month. The issues were resolved without any negative impact to the animal facility or animal well-being.

Additional PPE will become standard for personnel entering animal facilities housing NHPs.

H. SEMIANNUALS

H.1. Inspections

Update: Deficiencies

NEW Animal Procedure Area was inspected on 08/18/2021.
A research team requested IACUC authorization to use this patient-facing procedure area in an ongoing study. At the time of this meeting, the PI and research team have not received information to address the IACUC's observations. During the meeting, a member (C4) also raised concerns regarding scientific validity.
Action: the IACUC agreed to withhold authorization of this area for animal use until the researcher can address the IACUC's observations. On 09/10/2021, the OAWA Director informed the research team and the party responsible for the area of the IACUC's decision.

18-096-WCHIT expired on 10/05/2021. Animals were transferred to Holding on 10/04/2021.

18-097-I expired on 10/05/2021. Animals were transferred to Holding on 10/04/2021.

21-046

On 09/08/2021, one rabbit was anesthetized and prepared for surgery. The surgery was subsequently cancelled when the surgeon's arrival was significantly delayed. The rabbit recovered from anesthesia uneventfully with veterinary oversight.

Action: the IACUC determined no additional actions necessary.

D. DCM REPORT

Updates to DCM Personnel

Update: 20-015-SCHIL

The AV confirmed all protocol associates have completed facility orientation retraining.

Action: the IACUC determined no additional actions necessary.

HVAC issues in Bldg #1 occurred on 09/20/2021, 10/06/2021, and 10/13/2021. On each occasion, DCM personnel acted to ensure environments housing animals did not deviate from program standards. No instances of negative impact to animal well-being were observed.

Action: the IACUC determined no additional actions necessary.

Replacement for Existing Protocol #: 18-102

The IACUC discussed this replacement protocol and the IACUC memo dated 08/12/2020, in which PAM visits were requested at an increased frequency for 18-102-H. Since then, PAM visits occurred on a quarterly basis. Findings of each PAM visit revealed that the PI routinely performed animal activities in accordance with the approved AUP and adhered to programmatic expectations for animal care and use.

Action: the IACUC determined that PAM visits for 21-067-H shall be conducted at the minimum frequency outlined in Policy 126.

C.2. Reports

OLAW Annual Report submitted 11/01/2021

USDA Annual Report submitted 11/16/2021

Updates to the Classification of Protocol Submissions

Action: the IACUC agreed to consolidate the Classification of Protocol Submissions to require at least one primary reviewer (FCR) or DMR for all new and *de novo* protocol reviews.

21-021

On 11/16/2021, an unauthorized individual was found working with mice in an animal facility. The OAWA Director discussed the event with the PI on 11/17/2021.

Action: the IACUC determined no additional actions necessary at this time.

20-067

On 10/19/2021, the PI was notified by DCM that the number of animals being generated under this protocol exceeded the authorized amount approved by the IACUC. After to response, a reminder was sent on 11/19/2021, and all unassigned animals were transferred to Holding. The PI submitted an amendment on 11/23/2021.

Action: the IACUC determined no additional actions necessary at this time.

D. DCM REPORT

The AV summarized facility updates with the IACUC; no animals were adversely affected.

I. OTHER BUSINESS

I.1. Upcoming Events

The next general meeting of the IACUC will be held on Wednesday, January 12, 2021.

I.2. ACUP Documents for Review

I.3. IACUC Policies, Procedures, and Guidelines for Review

Discussion: IACUC Policy 121 and training requirements

The Committee strongly encourages DCM veterinarians and staff to assign supplemental hands-on training to animal users whenever indicated.

Action: the IACUC determined the current policy and training requirements sufficiently address programmatic need at this time.

Discussion: IACUC Policy 126 and annual review requirements

Action: the IACUC requested a proposed change in policy to review during the Committee's next meeting.

I.4. Comparative Medicine Policies, Procedures, and Guidelines for Review

B. APPROVAL OF MINUTES OF PREVIOUS MEETING

Presentation and review of the meeting minutes of December 8, 2021.

Action: the IACUC approved the minutes as written.

C. REPORT FROM THE CHAIR

C.1. IACUC Training

Lab Animal Volume 51, January 2022: Discretionary consent

C.2. Reports

2021 Protocol Review Metrics

19-084-SFCHIB

On 12/14/2021, research personnel conducted animal activities in a manner that deviated from the IACUC's expectations for acclimation and occupational safety. When confronted by DCM, the research personnel admitted to the deviations, and promptly took corrective actions. In response, the PI instructed the research personnel to re-take facility orientation training.

Action: the IACUC determined no additional actions necessary.

20-082-HB

On 11/19/2021, the AUP did not have enough available animal numbers for DCM to create new cage cards. The PI was notified but did not respond. DCM sent a reminder email on 12/22/2021. An associate from the research team promptly responded, confirming that all breeding activities ceased and an amendment to the AUP would be submitted to increase the number of animals. An amendment was submitted on 01/03/2022, and later approved by the IACUC on 01/06/2022.

Action: the IACUC determined no additional actions necessary regarding this AUP. The Committee felt that, in general, instances such as insufficient numbers of animals available on an AUP warranted more timely action. In response, the OAWA Director and the DCM Administrative Support Coordinator finalized an updated process to address the IACUC's request on 01/18/2022.

Protocol Expiration Report

19-001-FWCHB expired on 12/10/2021; animals were transferred to Holding on 12/07/2021

19-008-AI expired on 12/23/2021; animals were transferred to Holding on 12/20/2021

19-004-AFEH expired on 12/23/2021; animals were transferred to Holding on 12/20/2021

19-010-SEAPHR expired on 01/08/2022; animals were transferred to Holding on 01/05/2022

19-010-SEAPHR

On 01/06/2022, the OAWA Director learned that research personnel had been performing activities not described in the AUP. The research personnel admitted to the deviation, and promptly transferred the animals to the appropriate AUP (21-030-SEAHILF) later that day.

Action: the IACUC requested the Chair form a subcommittee to meet with the PI and co-Investigators regarding this and similar past findings. The Committee also requested a PAM visit be performed to monitor activities on 21-030-SEAHILF within the next 3 months. In response, the Chair and OAWA Director met with the co-Investigators on 01/20/2022.

Lab Animal Volume 51, March 2022: Renewed Responsibility

C.2. Reports

Protocol Expiration Report: No items to discuss

21-080-SFCILU

Action: the IACUC determined no additional action necessary.

19-007-CHIXB, 19-069-SHIB

Action: the IACUC determined no additional action necessary.

20-043-SACHITB, 20-072-ACHI

Action: the IACUC recommended reporting animal husbandry deviations to OLAW. The IACUC then recommended a subcommittee meet with PI to determine a responsive action plan.

A preliminary report was submitted to OLAW on 03/11/2022; a subcommittee of the IACUC met with the PI on 03/25/2022.

D. DCM REPORT

The AV summarized recent refinements in DCM's rodent sentinel monitoring program.

The AV reported deviations in room temperature found in some animal facilities over the past month. Once deviations were identified, DCM moved animals to nearby rooms until corrections were completed. Each incident was resolved within 24 hours of identification, and no adverse impact to animals was observed.

B. APPROVAL OF MINUTES OF PREVIOUS MEETING

Presentation and review of the meeting minutes of March 9, 2022.

Action: the IACUC approved the minutes as written.

C. REPORT FROM THE CHAIR

C.1. IACUC Training

Lab Animal Volume 51, April 2022 – Delaying the Inevitable: a Justified Means to an End?

C.2. Reports

Protocol Expiration Report

Update: 20-043-SACHITB, 20-072-ACHI

The PI met with a subcommittee of the IACUC on 03/25/2022. All previously-discussed issues have been addressed, and the PI agreed to a corrective action plan.

Action: the IACUC determined the action plan was appropriate, and no additional actions were necessary.

21-011-HI

The PI reported an unexpected outcome to the IACUC on 03/04/2022. PI consulted with DCM, and submitted an amendment to address the issue.

Action: the IACUC determined no additional actions were necessary.

20-096-SHIU

On 03/25/2022, animals inadvertently received an expired solution of analgesic drug. The PI promptly notified veterinary staff, who monitored the animals closely over the subsequent days and concluded no additional analgesics were indicated. The research team disposed of the expired drug and plan to physically separate expired drugs from in-date formulations in the future.

Action: the IACUC determined no additional actions were necessary.

20-061-TU (previously 19-010-SEAPHR)

On 01/05/2022, DCM transferred animals assigned to expiring 19-010-SEAPHR to Holding (20-061-TU). On 03/31/2022, DCM identified a sick animal and contacted the research team. A member of the research team then removed the animal from the facility and performed euthanasia procedures without authorization. The PI responded by submitting a revised replacement protocol on 04/08/2022.

Action: the IACUC determined no additional actions were necessary.

D. DCM REPORT

Animal Facility Updates:

- Bldg #7 is scheduled to undergo a generator test; the AV does not anticipate any adverse effect on animals.
- A facility in Bldg #8 recently underwent updates for compressed air and RO systems; this facility will return to washable rodent caging systems in a few months.
- A facility in Bldg #5 will undergo demolition to install a rack washer later this year; the AV will communicate the scheduled demolition with PIs to avoid any adverse effect on animals.
- Bldg #6 experienced a power outage on 03/30/2022 which resulted in no power to aquatic life support systems or the tunnel washer for several hours. DCM is performing an ongoing investigation into this event, as life support systems are supposed to be powered by the building generator in the event of a power outage. The event did not negatively impact any animals.

Update to DCM Animal Transfer Services

Overcrowded Rodent Caging

DCM has observed an increase in overcrowded rodent cages belonging to a PI over the past two months. Since, a DCM representative discussed this trend with the PI, the incidence of overcrowded cages has decreased.

Action: the IACUC determined no additional actions were necessary.

C.2. Reports

Protocol Expiration Report

19-027-SWCHBU expired on 04/14/2022; animals were transferred to Holding on 04/13/2022

21-080-SFCILU

The IACUC recently received concerns the animals may not undergo procedures as described in the protocol. During the initial evaluation of this concern, the PI was asked not to order additional animals. An initial subcommittee met with the PIs on 05/04/2022. In response to the subcommittee meeting, an amendment was submitted and approved that included modifications to the study aims, procedures, and sequence and timing of procedures. A summary of the concerns and the PIs' responses were summarized to the IACUC. Members expressed thoughts and ongoing concerns about the following topics during the meeting discussion:

- Scientific justification for the revised study aims
- Practical means to transport, anesthetize, and image existing animals on study

The Chair proposed a second subcommittee meeting with the PIs to discuss the ongoing concerns about this protocol.

Action: the IACUC determined additional information was necessary before allowing additional animals to progress through the study. Therefore, no additional animals may be ordered and no surgical procedures may be performed on animals currently assigned to the protocol until a modified action plan to address concerns can be considered by the IACUC.

A memo was sent to the PI summarizing the IACUC's decision on 05/11/2022. A second subcommittee meeting with the PIs was scheduled for 05/24/2022.

A member (D1) expressed concern about the IACUC reviewing proposals that have not undergone any peer review process. The Committee briefly discussed its Guidelines 208, and how best to review animal activities associated with internally-funded proposals. The IO agreed to consider a mechanism that might help provide the IACUC with more confidence in the scientific justification for internally-funded proposals.

20-085-PU

The PI plans to present the IACUC with a proposal in the future to have her animal-handling privileges reinstated. The Committee generally agreed to consider such a proposal.

Update: Protocol Management System

The internet browser that best supports all applications of the system will no longer be supported. Animal users that need access to all applications should work with their IT support team to identify alternative accessibility methods.

D. DCM REPORT

Rodent Overcrowding Report

22-005-SAFCHRIX – over 30 instances of cage overcrowding were identified last month

Action: the IACUC determined it necessary to remove approval for unnecessary trio breeding. The PI and research team should attend DCM colony management retraining within the next month. A memo was sent to the PI summarizing the IACUC's decision on 05/11/2022.

Events that occurred in all DCM animal facilities over the past month were summarized. All events were resolved in a timely manner and without adverse effects on animals.
