Dear Dr. Yates,

The Office of Laboratory Animal Welfare (OLAW) acknowledges receipt of your March 4, 2022 letter reporting an instance of noncompliance with the PHS Policy on Humane Care and Use of Laboratory Animals at the University of Pittsburgh. According to the information provided, OLAW understands that a box containing one deceased adult mouse was discovered during rounds on Saturday, January 29, 2022. The mouse was found stiff and hanging between the edge of the box and the box's screen. The mouse was likely trapped on the day of a routine cage change on January 26.

The IACUC approved the corrective action plan submitted by the animal facility director, which included the following item:

- The technician has been retrained to observe the box after a cage change to ensure mice are not trapped.

The IACUC levied the following sanctions:

- A letter was sent to the animal facility director regarding this event.

Based on the information provided, OLAW is satisfied that appropriate actions have been taken to investigate this incident and prevent recurrence. OLAW concurs that the incident warranted reporting. **OLAW also notes** that this trapped animal should have been noticed on routine health and welfare checks. We appreciate being informed of this matter and find no cause for further action by this office.

Sincerely,

Brent C. Morse -S
