Bcc: [REDACTED]

Hi [REDACTED]

I'm writing to inform you that this morning our animal health technician found [REDACTED] lying down and lethargic in his cage. He was immediately evaluated by the veterinarians and found to be lethargic and dehydrated. Also, there was minimal urine in the cage pag and the stool in the cage for both [REDACTED] and [REDACTED] were all dry, small, and hard. Based on these concerning findings, the vets decided to take both [REDACTED] and [REDACTED] off water restriction. They were both immediately given 1/2 bottle of water, and both drank readily. We will be administering meloxicam to [REDACTED] as well due to suspected discomfort from his cranial implant. They will both be off water restriction until they have been deemed improved by veterinary staff.

I will also be filing a report to the ACUC regarding this matter.
