NS1 has a degree in law and health science administration. Currently he is the Director of the Conflict-of-Interest office. NS1's background in law allows for valuable input regarding interpretation of the regulations that are not biased based on previous experience in the lab animal field or hypothesis based scientific inquiry. His experience with health care administration also provides valuable non-scientific information related to the business of research/health care that no other individual on the committee possesses. As the Director of the Conflict-of-Interest office, he also provides valuable information to the IACUC related to possible ethical issues related to funding and research that could jeopardize animal welfare if not mitigated.
