

**Summary of Exceptions to the Regulations and Standards**Registration Number: **14-R-0014**

1. IACUC-approved exception to requirement to sanitize the primary enclosure at least once every 2 weeks for non-human primates (Rhesus macaques; 0 animal), administered the radioisotope <sup>[89]</sup>Zr. Cages will not be changed until the isotope has decayed 10 half-lives (31 days). The animals' cages will be checked daily and spot cleaned in place as needed by husbandry staff instead of complete cage change.

While this exception is approved by the IACUC, there were no animals on the approved protocol that were impacted by this exception this reporting year.
