To Whom it may Concern:

The Oklahoma Medical Research Foundation (#73-R-0002) successfully requested inactivation of our research registration on August 5, 2017. It was our understanding (based on a phone conversation with the Ft. Collins office in April 2022) that with the elimination of inactive registration status as an option our registration would be cancelled.

It recently came to our attention that our registration has been inadvertently moved into "active" status. We request the immediate cancellation of our research registration. We have not housed or handled any USDA covered species at our facility since 2017 and we have no plans to do so in the near future.

We will reapply for registration if our operational needs change in the future. Please feel free to contact us if any additional information is needed and let us know if any additional action is required on our part.
