COLKET TRANSLATIONAL  
RESEARCH BLDG

Type: ROUTINE INSPECTION

Date: 17-MAY-2023

---

### 2.31(d)(8)

#### Institutional Animal Care and Use Committee (IACUC).

During a routine review of animal records performed by the IACUC, it was noted that there was a deviation of the protocol. Under Protocol A3, five pigs were sedated with ketamine and buprenorphine regular during the procedure but did not receive a fentanyl patch. According to the protocol, when buprenorphine regular is administered a fentanyl patch is required for the recovery period.

During the Spring 2023 semiannual program review, IACUC members identified a pig that received 1mg/kg of a ketamine bolus. Under protocol B1, the pig should have received 10-40mg/kg of a ketamine bolus.

Proposed activities and proposed significant changes in ongoing activities that have been approved by the IACUC may be subject to further appropriate review and approval by officials of the research facility. However, those officials may not approve an activity involving the care and use of animals if it has not been approved by the IACUC.

This has been corrected by the IACUC through a corrective action plan and protocol amendment.

Reasons Protocols Were Selected for Review :	How Many Protocols Were Selected
1. Protocols identified during inspection of concern (select all)	5
2. Column E protocols ( select all)	0
3. Protocols with IACUC-approved exemptions/exceptions (select all)	0
4. Protocols cited as noncompliant and not corrected during the last inspection (select all)	0
5. Additional Protocols Selected: a. If <5 remaining protocols, select all remaining:  b. If >5 remaining protocols, select 5 additional protocols: 1) Protocol for each regulated species and/or, 2) Protocols involving high risk procedures (see Chapter 7, Animal Welfare Inspection Guide for guidance);	0
<b>Total Protocols Selected and Reviewed</b>	5

<sup>\*</sup>Note: Protocol selection guidance applies to protocols which have been initially approved, or have had significant changes approved, since the last inspection. For protocols reviewed by an Animal Care Veterinary Medical Officer within the last year, professional judgment should be used in determining whether another review is necessary.
