Site: 001

COLUMBIA STATE COMMUNITY
COLLEGE

Type: ROUTINE INSPECTION

Date: 09-NOV-2022

2.31(c)(7)

Institutional Animal Care and Use Committee (IACUC).

Multiple protocols currently being used with regulated animals have been modified to include a change in the principal investigator of the protocols as a new director/investigator for the program/protocols has been hired. This includes the following protocols: FAT-HG, EH, GH, GPH, PIH, RHTP, RE, SPR and VH. The inspector observed teaching procedures from the protocols being conducted on regulated animals during today's inspection. The change in the principal investigator of a protocol is considered a significant change in ongoing activities and must be reviewed and approved by the IACUC. This has not yet been done. IACUC review and approval of all significant changes to a protocol is necessary for the IACUC to determine that the proposed significant changes meet the Animal Welfare Act requirements. The IACUC must review and approve all proposed significant changes regarding the care of and use of animals in ongoing activities including the change in principal investigator. Correct by 11/30/22.

2.31(e)(3)

Institutional Animal Care and Use Committee (IACUC).

The principal investigator has not updated the current protocols to include a complete description of the proposed use of the animals. This affected the following protocols: FATHG, EH, GH, PIH, RE, and VH. During today's inspection the inspector observed the students practicing intramuscular injections in a horse using saline. None of the current protocols

Inspection Report

included a description of this practice. The protocols that included injections simply stated 'injections'. They did not include a description of what would be injected (saline as was observed or only medically necessary injections) or a description of how many procedures/injections would be performed per animal. All protocols shall include a complete description of the proposed use of the animals to allow the IACUC to provide appropriate review and oversight. For teaching protocols a complete description should include a description of the procedures to be performed by the students and address concerns that may affect the well-being of the animals such as the number of procedures to be performed on each animal.

In order to be compliant the protocols listed must be modified to contain a complete description and thereafter approved by the IACUC in order for animals to be used in protocol activities. All protocols to conduct an activity involving animals must contain a complete description of the proposed use of the animals. Correct by 11/30/22.

2.38(I)(1)

Miscellaneous.

The facility has not yet documented a contingency plan. The attending veterinarian stated she has a file started with information to use to put the plan together but has not yet done so. A contingency plan is necessary to provide for the humane handling, treatment, transportation, housing and care of the animals in the event of an emergency or disaster which could reasonably be anticipated and expected to be detrimental to the good health and well-being of the animals. The facility shall develop, document and follow an appropriate contingency plan. Correct by 12/31/22.

This inspection was conducted with the veterinary technician and attending veterinarian and the exit interview was conducted with the attending veterinarian.

Reasons Protocols Were Selected for Review :	How Many Protocols Were Selected
1. Protocols identified during inspection of concern (select all)	4
2. Column E protocols (select all)	
3. Protocols with IACUC-approved exemptions/exceptions (select all)	
4. Protocols cited as noncompliant and not corrected during the last inspection (select all)	
5. Additional Protocols Selected: a. If <5 remaining protocols, select all remaining. b. If >5 remaining protocols, select 5 additional protocols: 1) Protocol for each regulated species and/or, 2) Protocols involving high risk procedures (see Chapter 7, Animal Welfare Inspection Guide for guidance).	5
Total Protocols Selected and Reviewed	6

*Note: Protocol selection guidance applies to protocols which have been initially approved, or have had significant changes approved, since the last inspection. For protocols reviewed by an Animal Care Veterinary Medical Officer within the last year, professional judgment should be used in determining whether another review is necessary.
