Site: 018
CHARLES RIVER BRF

Type: ROUTINE INSPECTION
Date: 07-MAR-2017

3.75(a)

HOUSING FACILITIES, GENERAL.

* Room Q6 in Building 2 was in use for animal housing during this inspection. The concrete floor in the room had a large, circular shaped epoxy patch. A depressed area of bare concrete was exposed where the patch had failed and peeled away. Water could pool and collect in the damaged floor area during routine husbandry procedures. Standing water can serve as a reservoir for microbial growth, contribute to excessive humidity levels and inhibit the benefits of cleaning in the animal housing room. Additionally, bacteria and water may degrade unsealed concrete. Facility personnel stated that the floor had been recently repaired. Alternative repair solutions may need to be reviewed.

*A slightly gaping, linear defect was noted in the ceiling of animal housing Room Q14 in Building 2. The defect was visible across almost the entire width of the ceiling and penetrated the dry wall and paint. Although no water stains were seen in the ceiling, the area surrounding the defect appeared moist and prolonged rainfall has recently occurred in the area. Continued deterioration may cause the dry wall ceiling to collapse into the room. Facility personnel indicated the exterior roof will be checked for possible leaks immediately.

All animal housing facilities must be structurally sound and kept in good repair to prevent injury to the animals and facilitate required husbandry procedures. The above identified non-compliances should be repaired or replaced.

Correct by: April 13, 2017.

3.84(d)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

Room Q3 in Building 2 was housing animals during this inspection. Numerous drain flies were noted on the back wall and in the corner of the walls at the ceiling junction on the left side. An abundance of flies were also noted in the uncovered drain on the left side of the room as well as the wall above the drain.

Insects may carry and transmit diseases and cause annoyance to the animals. The flies should be eliminated from

2.38(f) CRITICAL

MISCELLANEOUS.

Three mini pigs suffered leg injuries during husbandry or study activities and were subsequently euthanized. One was during a waterline check where the enclosure door was opened and the animal either jumped or fell out, injuring a leg during the fall. Another was during removal of the animal from its enclosure for an undetermined purpose (cage cleaning/study activity/other), and the animal's hoof was somehow injured in the process; a clear cause of the injury was not able to be determined. A third animal was being dosed via oral gavage and experienced a leg injury while in the restraint sling. In all three of these instances, the injuries were immediately noted, reported to the veterinarian, and euthanasia was performed in a timely manner. The facility has reviewed each incident individually to determine cause, and in each case corrective measures were taken, including re-training of staff and implementing adjustments to water checks and cage removal procedures to prevent recurrence of such injuries. A review of husbandry procedures suggested there is no current or ongoing risks of recurrence. However, these incidents caused serious impacts to animal welfare. Handling of animals must be done as expeditiously and carefully as possible, in a manner that does not cause trauma, overheating, excessive cooling, behavioral stress, physical harm, or unnecessary discomfort. Correct from this time forward.

This inspection was conducted from 20-22 March 2017 with veterinary and compliance staff. An exit interview was conducted on 22 March 2017 with the site director, veterinary and compliance staff.

Hi

(b) (6), (b) (7)(C)

Here is the inspection report from the inspection conducted Wednesday 2/28/18 plus the Research Protocol Selection form. Please note that if you are viewing this e-mail on an iPhone that the RPS form will appear blank but is filled out when viewing it on a computer.

I have sent the report in a PDF format. *****Please acknowledge that you successfully received the inspection report via a return e-mail to me.***** The return e-mail takes the place of a "received by" signature on the report.

If you are having any difficulty sending an e-mail response, please let me know by calling me at 860-423-6431 and I can send the report to you by a different method.

Thanks and have a good weekend.

Paula

Hi

Here are the inspection and inventory reports from the inspection conducted Wednesday 5/8/19 plus the Research Protocol Selection form. Please note that if you are viewing this e-mail on an iPhone that the RPS form may appear blank but is filled out when viewing it on a computer. We are required to prepare one of these forms for every research facility inspection even when no protocols were reviewed.

I have sent the inspection report in a PDF format. *****Please acknowledge within 5 days that you successfully received the inspection report via a return e-mail to me.***** The return e-mail takes the place of a "received by" signature on the report.

If you are having any difficulty sending an e-mail response, please let me know by calling me at 860-423-6431 and I can send the report to you by a different method.

Thanks and have a great weekend!

Paula

RE: USDA Research Registration #14-R-0144
Addition of new site: Mattawan, MI

Dear Dr. Goldentyer,

The purpose of this letter is to request the addition of a new Charles River site to be covered under our existing Research Registration (certificate number 14-R-0144, customer number 1799). On April 3, 2018 Charles River purchased MPI Research, Inc. The MPI Research site located at 54943 North Main Street, Mattawan, MI 49071, and previously registered as certificate number 34-R-0031 (customer number 696 and site 001), is now a Charles River Company site.

A separate letter has been sent to your attention by MPI Research requesting the cancellation of their USDA registration (certificate number 34-R-0031, customer number 696 and site 001) and USDA B license (34-B-0171) due to the change in ownership.

All instructions regarding accessing the site through the posted visitor parking lot and visitor entrance, normal business hours and all contact telephone numbers remain the same as previously established by MPI Research, Inc.

If we can provide any additional information or answer any questions, please contact me at (b) (6), (b) (7)(C)@crl.com (b) (6), (b) (7)(C) or (b) (6), (b) (7)(C) (b) (6), (b) (7)(C) (b) (6), (b) (7)(C) @crl.com (b) (6), (b) (7)(C)

Subject: Request for site removal from research registration

Hi Betty,
Happy New Year! I hope that you are doing well. Attached please find a letter requesting the removal of the CR Research Models site in San Diego, CA (site 25) from the CR USDA research registration. We will no longer have any USDA regulated animal use activity at this location. Please let me know if you have any questions or need any additional information. Thank you!

Kind regards,

Re: USDA Research Registration 14-R-144
Removal/Deletion of Site #: 025

Dear Dr. Goldentyer:

The purpose of this letter is to inform you that effective January 4, 2019 Charles River Laboratories, Inc. would like to remove the Charles River Laboratories Research Models and Services – San Diego, CA, site located at (b) (7)(F) (b) (7)(F) from the above mentioned USDA Research Registration. There will no longer be USDA regulated animal activities conducted by Charles River at this location. The last day of animal activity at the site was December 28, 2018.

If I can be of any further assistance, please contact me.

Sincerely,

(b) (6), (b) (7)(C)

RE: USDA Research Registration #14-R-0144
Addition of new site: Frederick, MD

Dear Dr. Goldentyer,

The purpose of this letter is to request the addition of a new Charles River site to be covered under our existing Research Registration (certificate number 14-R-0144, customer number 1799). The site will be called Charles River Laboratories, Safety Assessment (SA) Frederick and it is located at (b) (7)(F) (b) (7)(F). The phone number for this location is (b) (6), (b) (7)(C) (b) (6), (b) (7)(C). Her direct line is (b) (6), (b) (7)(C). We would like the registration of this site to be effective May 17, 2019.

.Access to the site is through a manned guard station at the entrance gate to the property. Please follow the instructions posted at the gate and listed below.

Instructions at the gate:

A manned guard station is located at the entrance gate to the property. Press the button at the badge reader on your left, and announce yourself to the guard. The guard will come to you, review your identification, sign you in as a visitor, announce you to company staff and then allow you to enter and park for building entry.

If we can provide any additional information or answer any questions, please contact me at (b) (6), (b) (7)(C)@crl.com (b) (6), (b) (7)(C) or (b) (6), (b) (7)(C) (b) (6), (b) (7)(C) at (b) (6), (b) (7)(C)@crl.com (b) (6), (b) (7)(C)

Sincerely,

(b) (6), (b) (7)(C)

CC: (b) (6), (b) (7)(C)
