Re: Animal Welfare Assurance A3381-01 [OLAW Case 1Z]

Dr. Jennifer K. Lodge Vice Chancellor for Research Washington University in St. Louis 660 South Euclid Ave., Box 8108 St. Louis, MO 63130

Dear Dr. Lodge,

The Office of Laboratory Animal Welfare (OLAW) acknowledges receipt of your June 12, 2018 letter reporting an instance of noncompliance with the PHS Policy on Humane Care and Use of Laboratory Animals at Washington University in St. Louis, following up on an initial telephone report on April 10, 2018. According to the information provided, OLAW understands that post-operative monitoring records were incomplete for fifty mice. Monitoring had been conducted and no problems were noticed with the mice, but it had not been recorded.

The corrective actions consisted of retraining the surgeon who agreed to appropriately document all post-operative monitoring.

Based on its assessment of this explanation, OLAW understands that measures have been implemented to correct and prevent recurrence of this problem. OLAW concurs with the actions taken by the institution to comply with the PHS Policy.

Sincerely,

(b) (6)

Axel Wolff, M.S., D.V.M.
Deputy Director
Office of Laboratory Animal Welfare

Assurance: D16-00245 (A3381-01)

Dr. Axel Wolff, DVM, MS Deputy Director, Office of Laboratory Animal Welfare National Institutes of Health Rockledge Drive Bethesda, MD 20892-7982

Initial Report: April 10, 2018

Protocol: #20150043 "Molecular Mechanisms Regulating Axon Maintenance"

Dear Dr. Wolff,

Washington University in St. Louis (WU), in accordance with PHS Policy IV.F.3 and Assurance D16-00245, submits this final report for a non-compliant event initially reported by the IACUC Director on April 10, 2018.

During a post-approval monitoring visit and surgery records review, inspectors identified incomplete documentation of post-operative monitoring in approximately fifty mice. Post-operative monitoring had been completed as described in the protocol and no adverse clinical consequences were observed. The surgeon thought the documentation was only required in the event of a complication.

In response, the surgeon completed retraining with members of the Quality Assurance/Quality Improvement staff and provided assurances that all post-operative monitoring activities would be appropriately documented. The incident and completed corrective actions were reviewed by the IACUC at the April 24, 2018 meeting and the committee considers the incident resolved.

The protocol is supported by NIH funding (R01 CA21986601, R01 NS06505308, and R21 NS087562) but no specific costs were determined to be associated with the incident. In accordance with NIH Grants policy, any NIH funds directly associated with noncompliant events would be returned.

Please let me know if you have any questions or would like additional information.

Sincerely,

Jennsfer K. Locke, Ph.D.
