

According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0579-0036. The time required to complete the information collection is estimated to average .25 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Every research facility, carrier, and intermediate handler not required to be licensed under Section 3 of the Animal Welfare Act, shall register with the USDA (7 U.S.C. 2136). This application provides information for such registration.

13. Other Animals	0	0	0	0	0

ASSURANCE STATEMENTS

- 1.) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- 2.) Each principal investigator has considered alternatives to painful procedures.
- 3.) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- 4.) The attending veterinarian for this research facility has appropriate authority to ensure the provisions of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

CERTIFICATION BY HEADQUARTERS RESEARCH FACILITY OFFICIAL
(Chief Executive Officer (C.E.O.) or Legally Responsible Institutional Official (L.R.O.))

3.131(a) DIRECT

SANITATION.

There was one male miniature pig (#773, DOB 20 FEB 2017) housed in an enclosure with an excessive amount of waste water and excreta on his floor and bedding. The pig could not lay down without coming in contact with his own fecal material. The light colored bedding shavings, which turn dark-gold when wet, were completely saturated with liquid. There was a fecal-contaminated puddle covering more than 1/4 of the enclosure floor space. The facility representative stated they normally clean the enclosures every morning but had not cleaned by the time of inspection (early afternoon) due to a busy schedule. Waste water and excreta that is not removed or drained properly from enclosures poses a health risk for animals. Pig #773 was under the care and monitoring of the Attending Veterinarian due to a very thin body condition. This made the need for a clean and dry enclosure even more important for this animal's health and comfort. The facility must ensure that excreta and waste water is removed from all animal enclosures as often as necessary to minimize disease hazards. This non-compliant item was corrected at the time of inspection.

The inspection was conducted on 11 and 14 August 2017 and an exit interview was conducted with facility personnel.

Dear Dr. Tims:

I want to inform you of a membership change in MRIGlobal's Institutional Animal Care and Use Committee ("IACUC"). This change is effective today, December 1, 2015.

Dr. (b) (6), (b) (7)(C) is hereby appointed as Attending Veterinarian/Voting member, replacing Dr. (b) (6), (b) (7)(C).

The appointed IACUC members and their roles are now as follows:

(b) (6), (b) (7)(C)

(b) (6), (b) (7)(C) Executive Assistant, serves as the IACUC's Documents Coordinator.

If you have any questions or require clarification concerning this change, please contact

(b) (6), (b) (7)(C)

Sincerely,

Thomas M. Sack, Ph.D.
President & CEO
Institutional Official
