CHILDRENS NUTRITION RESEARCH CENTER

Type: ROUTINE INSPECTION

Date: 01-AUG-2017

2.33(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE.

During the time of inspection, the following medications were past the expiration date: Beuthanasia 390 mg- ml expired 12/2016 and Atropine 100 ml bottle- expired 10/2016. These medications were intermingled with other pharmaceuticals that are currently being used in the facility and are therefore ready for use. Researcher stated these pharmaceuticals were used on an animal two weeks ago under an active protocol. The effectiveness of the dosage level and expected results when expired drugs are administered to the animals could be drastically changed or may not work as anticipated. The licensee must ensure that all medications used are not expired in accordance with standard veterinary practices and manufacturer's recommendations.

To be corrected from this point forward.

The inspection and exit briefing were conducted with facility representatives.

Additional Inspectors

Moore Mary, Veterinary Medical Officer
