ANIMAL AND PLANT HEALTH INSPECTION SERVICE

ANIMAL CARE
(Program of Veterinary Care for Research Facilities or Exhibitors/Dealers)

Cats

SECTION 1. A program of veterinary Care (PVC) has been established between:	
A. LICENSEE/REGISTRANT	B. VETERINARIAN
1. NAME Los Angeles Pierce College Veterinary Technology Program	1. NAME
2. BUSINESS NAME Los Angeles Pierce College	2. CLINIC (N/A) Same
3. USDA LICENSE/REG# 93R-053	3. STATE LIC.#
4. MAILING ADDRESS 6201 Winnetka Ave	4. BUSINESS ADDRESS 6201 Winnetka Ave
5. CITY, STATE, ZIP Woodland Hills, CA 91371	5. CITY, STATE, ZIP Woodland Hills, CA 91371
6. PHONE # (818) 719-6497	6. PHONE # (HOME)

The attending veterinarian shall establish, maintain and supervise programs of disease control and prevention, pest and parasite control, pre-procedural care, nutrition, euthanasia and adequate veterinary care for all animals on the premises of the licensee/registrant. A written program of adequate veterinary care between the licensee/registrant and the doctor of veterinary medicine shall be established and reviewed on an annual basis. By law, such programs must include regularly scheduled visits to the premises by the veterinarian. Scheduled visits are required to monitor animal health and husbandry.

Pages or blocks which do not apply to the facility should be marked N/A. If space provided is not adequate for a specific topic, additional sheets may be added. Please indicate Section and Item Number.

I have read and completed this Program of Veterinary Care, and understand my responsibilities.

Regularly scheduled visits by the veterinarian will occur at the following frequencies:

At least twice per semester

C. SIGNATURE OF LICENSEE/REGISTRANT

DATE

D. SIGNATURE OF VETERINARIAN

DATE

A. VACCINATIONS - LIST THE DISEASES FOR WHICH VACCINATIONS ARE PERFORMED AND THE FREQUENCY OF VACCINATIONS

Kittens under 6 months of age are not used as program animals. Animals are only kept for one semester, then adopted to a private owner.

FVRCP: Animals 6 months of age or older with an unknown vaccine status will be given a vaccine upon entry and a booster 3-4 weeks later.

Rabies: Animals 6 months of age or older with an unknown vaccine status will be given a vaccine upon entry and a booster one year later.

B. PARASITE CONTROL PROGRAM - DESCRIBE THE FREQUENCY OF SAMPLING OR TREATMENT FOR THE FOLLOWING:

1. **ECTOPARASITES** (Fleas, Ticks, Mites, Lice, Flies): Upon entry the animal will be checked for ectoparasites. Advantage (or similar product) will be applied as directed for control of ectoparasites.

2. **BLOOD PARASITES:** Adult cats will be given an FeLV test upon entry, unless proven negative from a previous ELISA test.

3. **INTESTINAL PARASITES:**

Fecals will be performed upon entry and monthly thereafter while in the custody of the RVT Program.

Deworming treatment given as needed using Panacur SID for 3 days.

C. EMERGENCY CARE

1. **DESCRIBE PROVISIONS FOR EMERGENCY, WEEKEND AND HOLIDAY CARE:**

Senior RVT students and AS 180 students perform daily care. If animals are present on weekends and/or holidays, staff may provide care or supervise care by students.

For emergencies during school hours, the faculty and staff are to be contacted.

For emergencies after school hours contact Warner Center Pet Clinic (818) 710-8528; 20930 Victory Blvd, Woodland Hills

2. **DESCRIBE CAPTURE AND RESTRAINT METHOD(S)**

Initially manual restraint shall be used. Chemical restraint may be used as needed at the discretion of the DVM or RVT.

D. EUTHANASIA

1. SICK, DISEASED, INJURED OR LAME ANIMALS SHALL BE PROVIDED WITH VETERINARY CARE OR EUTHANIZED. EUTHANASIA WILL BE IN ACCORDANCE WITH THE AVMA RECOMMENDATIONS AND WILL BE CARRIED OUT BY THE FOLLOWING:

VETERINARIAN ☒__

RVT ☒__

2. METHOD(S) OF EUTHANASIA:

IV Euthanasia solution 1cc/10#

E. OTHER:

Cats shall be weighed once weekly. Behavioral enrichment is provided by gang housing, opportunity to climb, a view to the outdoors and regular human interaction. Toys are also provided for entertainment.

F. DIET:

Hill's Science Diet Feline Maintenance dry, or equivalent, fed according to weight. Fresh water at all times.

E. ADDITIONAL PROGRAM TOPICS - THE FOLLOWING TOPICS HAVE BEEN DISCUSSED IN THE FORMULATION OF THE PROGRAM OF VETERINARY CARE

CARNIVORES: N/A

HOOFED STOCK: Horses

- 1) Tetanus toxoid annually IM or per manufacturer's directions.
- 2) Western and Eastern Equine encephalitis virus annually IM or per manufacturer's directions. To be administered in Spring.
- 3) West Nile virus annually IM or per manufacturer's directions. To be administered in Spring.
- 4) Rabies virus annually IM or per manufacturer's directions.

ELEPHANTS: N/A

MARINE MAMMALS: N/A

OTHER (specify): N/A

B. PARASITE CONTROL PROGRAM - DESCRIBE THE FREQUENCY OF SAMPLING OR TREATMENT FOR THE FOLLOWING:

1. ECTOPARASITES (Fleas, Ticks, Mites, Lice, Flies):
Pyrethrin based sprays or dips, as directed by veterinarian.
2. BLOOD PARASITES: N/A
3. INTESTINAL PARASITES:
 - Fecal samples tested 1-2 times yearly.
 - Deworming 4-6 times per year as follows:
 - Ivermectin 0.2 mg/Kg IM, oral paste, or oral solution
 - Moxidectin 0.4 mg/Kg PO
 - Fenbendazole; granules 5.1 mg/Kg PO; paste 5 mg/Kg PO; for *Parascaris equorum* 10 mg/Kg PO

C. EMERGENCY CARE

1. DESCRIBE PROVISIONS FOR EMERGENCY, WEEKEND AND HOLIDAY CARE:
Farm staff will provide routine care to horses on weekends and holidays. Emergency care will be provided by:

During work hours, emergencies should be reported to authorities in this order:

Farm Manager	(818) 719-6406
Program Veterinarian	(818) 710-4160

On weekends, holidays and non-work hours, emergencies should be reported to the Sheriff's Office, who will contact the above mentioned authorities in that order. Ag techs may contact the Farm Manager directly.

Sheriff's Office: (818) 719-6450

Veterinarians to call for Large Animal emergencies:

Humphrey, Giacomuzzi and Associates (805) 386-4291

2. DESCRIBE CAPTURE AND RESTRAINT METHOD(S)

- Halter and lead rope techniques will be used.
- Sedation and other restraint techniques may be administered as directed by the veterinarian.

D. EUTHANASIA

1. SICK, DISEASED, INJURED OR LAME ANIMALS SHALL BE PROVIDED WITH VETERINARY CARE OR EUTHANIZED. EUTHANASIA WILL BE IN ACCORDANCE WITH THE AVMA RECOMMENDATIONS AND WILL BE CARRIED OUT BY THE FOLLOWING:

VETERINARIAN ☒ X

RVT _____

2. METHOD(S) OF EUTHANASIA:

Euthanasia solution 1cc/10# IV

E. OTHER:

1. Hoof care shall be provided every 6-10 weeks based on the advice of the lead equine instructor or Program Veterinarian.
2. Physical exams will be performed once a year under the supervision of a veterinarian.
3. Dental care shall be provided by a veterinarian 1-2 times per year as indicated.

F. DIET:

- Horses are fed twice daily in the early morning and late afternoon within industry standards with maintenance of normal weight and health, as determined by lead equine instructor and program veterinarian.
- An equine trace mineral/salt block is provided at all times.
- Water is available at all times.

A. VACCINATIONS - LIST THE DISEASES FOR WHICH VACCINATIONS ARE PERFORMED AND THE FREQUENCY OF VACCINATIONS (Enter N/A if not applicable)

Chickens will be vaccinated at one day old for Newcastle Disease and Marek's Disease.

CARNIVORES: N/A

1) HOOFED STOCK: N/A

ELEPHANTS: N/A

MARINE MAMMALS: N/A

OTHER (specify): **Chickens**

B. PARASITE CONTROL PROGRAM - DESCRIBE THE FREQUENCY OF SAMPLING OR TREATMENT FOR THE FOLLOWING:

1. ECTOPARASITES (Fleas, Ticks, Mites, Lice, Flies): Good sanitation practices to control spread of ectoparasites. Prevent contact with wild birds. Use Permethrin dust once per year or at the discretion of program DVM.

2. BLOOD PARASITES: N/A

3. INTESTINAL PARASITES: Representative flock fecal samples tested once yearly.

C. EMERGENCY CARE

DESCRIBE PROVISIONS FOR EMERGENCY, WEEKEND AND HOLIDAY CARE:

1. Farm staff provides animal care on weekends and holidays.
2. Only Administrators and Agriculture faculty are authorized to call a veterinarian onto the premises.
3. During work hours, emergencies should be reported to authorities in this order:

Farm Manager	(818) 719-6406
Program Veterinarian	(818) 710-4160
RVT Program Director	(818) 719-6497
Department Chair	(818) 719-6497

Sheriff's Office:	(818) 719-6450
-------------------	----------------
5. Veterinarians to call for Large Animal emergencies:

Dr. Giacomuzzi	(805) 386-4291
Dr. Williams	(661) 268-8128

6. DESCRIBE CAPTURE AND RESTRAINT METHOD(S)

Use two hands, reach over the back of the bird and, just prior to making contact, drop the hands to hold the wings down on the body. Hold chicken snugly but do not inhibit chest movement. While restraining, stay aware of where chicken's talons and beak are at all times to avoid unnecessary injury to yourself and others.

D. EUTHANASIA

1. SICK, DISEASED, INJURED OR LAME ANIMALS SHALL BE PROVIDED WITH VETERINARY CARE OR EUTHANIZED. EUTHANASIA WILL BE IN ACCORDANCE WITH THE AVMA RECOMMENDATIONS AND WILL BE CARRIED OUT BY THE FOLLOWING:

VETERINARIAN ☒ X

RVT ☒ X

2. METHOD(S) OF EUTHANASIA:

IV Euthanasia solution 1cc/10#.

Option: anesthetize the chicken with Isoflurane and O2 prior to injection.

E. BASIC HUSBANDRY PROTOCOL:

DAILY

1. Feed mash and crumbles.
2. Clean water and change water.
3. Scoop feces and rake straw.
4. Check nesting material; replenish as needed.
5. Check temperature and adjust fans or heat lamps as needed.
6. Maintain records.

WEEKLY

1. Check feed supply. Replenish as needed.
2. Sanitize water dispensers with a 1:30 bleach solution.
3. Remove any heavily soiled straw.
4. Sweep walkways and outside of chicken coop.
5. Perform coop inspection.

MONTHLY

1. Remove and replace all straw (can leave straw up to 3 months if not soiled).
2. Tidy up storage and work areas.
3. Check on supplies.
4. Perform safety inspection for coop and equipment.

F. DIET: chickens are provided with fresh food and water daily.

Chicken scratch is fed ad lib. Supplements will be provided at the discretion of the program veterinarian.

A. VACCINATIONS - LIST THE DISEASES FOR WHICH VACCINATIONS ARE PERFORMED AND THE FREQUENCY OF VACCINATIONS (Enter N/A if not applicable)

HOOFED STOCK: Sheep

- 1) Clostridium perfringens type C and D twice annually SQ or IM per manufacturer.
- 2) Tetani bacterin toxoid twice annually SQ or IM per manufacturer.

If breeding, one of the two yearly vaccinations is administered 3-4 weeks prior to lambing. Lambs are vaccinated with CDT at 2-3 months old, with boosters given one month later. In addition, lambs are given tetanus antitoxin at elastration and tail docking.

B. PARASITE CONTROL PROGRAM - DESCRIBE THE FREQUENCY OF SAMPLING OR TREATMENT FOR THE FOLLOWING:

1. ECTOPARASITES (Fleas, Ticks, Mites, Lice, Flies):

Moxidectin po 0.2 mg/kg and / or dips, sprays, dusts as directed by veterinarian.

Carbaryl for chewing lice twice a year, including after shearing.

Ivermectin for sucking lice.

Atroban concentrate diluted into a spray

2. BLOOD PARASITES: N/A

3. INTESTINAL PARASITES:

- Fecal samples tested twice yearly for monitoring effectiveness of deworming program
- Deworming protocol:
 - Albendazole (Valbazen) po oral drench (**NOT when pregnant**) 5-10 mg/kg
 - OR Fenbendazole (5 days for Nematodirus)
 - OR Ivermectin 0.2 - 0.3 mg/kg (for pregnant animals)
 - OR Moxidectin 0.2 mg/kg
 - Booster follow-up 2 weeks after treatment.

C. EMERGENCY CARE

DESCRIBE PROVISIONS FOR EMERGENCY, WEEKEND AND HOLIDAY CARE:

Farm staff provides animal care on weekends and holidays. Only Administrators and Agriculture faculty are authorized to call a veterinarian onto the premises.

During work hours, emergencies should be reported to authorities in this order:

Farm Manager	(818) 719-6406
Program Veterinarian	(818) 710-4160
RVT Program Director	(818) 719-6497
Department Chair	(818) 719-6497

On weekends, holidays and non-work hours, emergencies should be reported to the Sheriff's Office, who will contact the above mentioned authorities in that order. Ag techs may contact the Farm Manager directly.

Sheriff's Office:	(818) 719-6450
-------------------	----------------

Veterinarians to call for Large Animal emergencies:

Dr. Giacomuzzi	(805) 386-4291
Dr. Williams	(661) 268-8128

2. DESCRIBE CAPTURE AND RESTRAINT METHOD(S)

- Manual restraint will be used.
- Halters may be used as needed.
- Chutes may be used as needed.
- Sedation may be administered as directed by the veterinarian.

D. EUTHANASIA

1. Sick, diseased, injured, or lame animals shall be provided with veterinary care, sold at commercial market, placed with a caregiver, or euthanized as determined by the veterinarian and farm manager. Euthanasia will be in accordance with the AVMA recommendations and will be carried out by the following:

VETERINARIAN ☐ X ☐

RVT ☐ X ☐

2. METHOD(S) OF EUTHANASIA:

Euthanasia solution 1ml/10lbs administered intravenously.

Option: Sedation may be administered prior to euthanasia injection

E. OTHER:

Procedures shall be consolidated as much as possible to avoid stress to the sheep.

1. Hooves shall be examined four times a year and trimmed as needed.
2. Wool will be sheared once a year in the spring.
3. Physical exams will be performed once a year.
4. Elastration at 2 days – 2 weeks. May be delayed to 3-4 weeks if testicles are undescended.
 - a. Alternatively, surgical castration may be performed under anesthesia with proper pain control.
5. Tail docking at 2 days- 2 weeks. Sedation and pain control may be utilized as needed.
6. Ear tags applied within 2 weeks of birth. A State identification tag will be applied.

F. DIET:

- Sheep are pasture-fed and supplemented daily with hay and alfalfa (when nursing). Quantity depending on pasture quality.
- Sheep are fed hay twice daily in the morning and late afternoon when not on pasture.
- A protein supplement block may be provided (not required), but especially during lactation.
- Salt-mineral blocks are provided at all times.
- Water is available at all times.
- Grain is supplemented starting 3 weeks prior to breeding for ram and ewes, to one week after breeding for ewes, and 2-4 weeks pre-partum for ewes to 6-8 weeks post-partum to ewe and ewe lambs. Grain may be continued throughout lactation.
- Copper bolus supplemented as needed.

E. ADDITIONAL PROGRAM TOPICS - THE FOLLOWING TOPICS HAVE BEEN DISCUSSED IN THE FORMULATION OF THE PROGRAM OF VETERINARY CARE

Pest Control and Product Safety ☐ X ☐

Quarantine Procedures: N/A

Zoonoses X

Environmental Enhancement X

Water Quality (Marine mammals) N/A

Species specific Behaviors X

Proper Storage and Handling of Drugs and Biologics X

Proper Use of Analgesics and Sedatives X

Due to the school calendar schedule, consideration will be given to establishing the breeding schedule so that animal nursing classes are in session when the lambs are under 4 weeks old for castrating and tail-docking.

Adult healthy cattle:

- 1- Infectious Bovine Rhinotracheitis (IBR) modified live or killed virus annually subcutaneous or intranasal depending on manufacturer.
- 2- Bovine Virus Diarrhea (BVD) modified live or killed virus annually subcutaneous.
- 3- Parainfluenza 3 (PI3) modified live virus annually subcutaneous or intranasal depending on manufacturer.
- 4- Bovine Respiratory Syncytial Virus (BRSV) modified live or killed virus subcutaneous or intranasal depending on manufacturer.
- 5- Leptospirosis (lepto 5 = 5 different strains of leptospirosis) bacterin, annually subcutaneous.
- 6- Clostridium 7- way, bacterin, annually subcutaneous includes:
 - Clostridium chauvei - Black leg,
 - Clostridium septicum – Malignant edema
 - Clostridium perfringens type C and D - Enterotoxemia
 - Clostridium sordellii – Gas Gangrene
 - Clostridium novyi – Black Disease
 - Clostridium haemolyticum – Bacillary Hemoglobinuria

Note: IBR and BVD, PI3 and BRSV, Lepto can be injected in different combination depending on the manufacturer.

Adult female before breeding and after calving:

1. Infectious Bovine Rhinotracheitis (IBR) modified live or killed virus annually subcutaneous or intranasal depending on manufacturer.
2. Bovine Virus Diarrhea (BVD) modified live or killed virus annually subcutaneous.
3. Parainfluenza 3 (PI3) modified live virus annually
4. Bovine Respiratory Syncytial Virus (BRSV) modified live or killed virus
5. Leptospirosis (lepto 5 = 5 different strains of leptospirosis) bacterin, annually subcutaneous.
6. Clostridium 7- way, bacterin, annually subcutaneous includes:
 - Clostridium chauvei - Black leg,
 - Clostridium septicum – Malignant edema
 - Clostridium perfringens type C and D - Enterotoxemia
 - Clostridium sordellii – Gas Gangrene
 - Clostridium novyi – Black Disease
 - Clostridium haemolyticum – Bacillary Hemoglobinuria

Note: breeding is done by artificial insemination

During work hours, emergencies should be reported to authorities in this order:

Farm Manager	(818) 719-6406
Program Veterinarian	(818) 710-4160
RVT Program Director	(818) 719-6497
Department Chair	(818) 719-6497

On weekends, holidays and non-work hours, emergencies should be reported to the Sheriff's Office, who will contact the above mentioned authorities in that order. Ag techs may contact the Farm Manager directly.

Sheriff's Office: (818) 719-6450

Veterinarians to call for Large Animal emergencies:

Dr. Giacomuzzi	(805) 386-4291
Dr. Williams	(661) 268-8128

DESCRIBE CAPTURE AND RESTRAINT METHODS:

Chutes and stanchions will be used as needed.

Sedation may be administered as directed by veterinarian

EUTHANASIA

1. Sick, diseased, injured, or lame animals shall be provided with veterinary care, sold at commercial market, placed with a caregiver, or euthanized as determined by the veterinarian and farm manager. Euthanasia will be in accordance with the AVMA recommendations and will be carried out by the following:

VETERINARIAN ☒

RVT ☒

2. METHOD(S) OF EUTHANASIA:

IV Euthanasia solution 1cc/10#

Option: Sedation may be administered prior to euthanasia injection

OTHER:

1. Physical exam once a year at vaccination
2. All breeding is by Artificial Insemination. The Artificial Insemination schedule will follow the school calendar of the large animal classes.
3. Ear tags applied when born but no later than at weaning age.
4. Hoof examination and trimming as necessary twice yearly or PRN by professional.

Calves:

At 0-8 days old.

1. Infectious Bovine Rhinotracheitis (IBR) modified live or killed virus annually subcutaneous or intranasal depending on manufacturer.
2. Parainfluenza 3 (PI3) modified live virus annually.
3. Bovine Respiratory Syncytial Virus (BRSV) modified live or killed virus.
4. Selenium supplement as needed.

At 4 months old through 12 months.

1. Clostridium 7- way , bacterin, annually subcutaneous includes:
Clostridium chauvei - Black leg,
Clostridium septicum – Malignant edema
Clostridium perfringens type C and D - Enterotoxemia
Clostridium sordellii – Gas Gangrene
Clostridium novyi – Black Disease
Clostridium haemolyticum – Bacillary Hemoglobinuria
2. Brucellosis modified live virus mandatory vaccine confirmed by tattoo in the right ear with the year the vaccine has been done. Only administered to females no later than 8-10 months old.
3. Bull calves: Tetanus, toxoid, subcutaneous 1 week prior to castration.

ECTOPARASITES:**Flies**

During summer months (May through September, depending on the weather) spray every month with Permethrin.

Lice, mites, cattle grub, other

Examination once a year.

Moxidectin pour-on 0.5 mg/kg twice a year for ectoparasites as directed by veterinarian.

Alternatively, Valbazen 10 mg/kg oral twice a year for ectoparasites as directed by veterinarian.

Endoparasites

One fecal test once a year for monitoring.

Deworming twice a year (mandatory).

Moxidectin pour-on 0.5 mg/kg twice a year as directed by veterinarian.

Valbazen 10 mg/kg oral twice a year as directed by veterinarian.

EMERGENCY CARE

Farm staff provides animal care on weekends and holidays. Only Administrators and Agriculture faculty are authorized to call a veterinarian onto the premises.

DIET:

Cattle are pasture-fed and supplemented daily with 3 way (oat, barley, wheat) hay and alfalfa (when nursing) quantity depends on pasture.

Cattle fed twice when not on pasture.

Protein supplement: given 2 weeks pre-partum and during lactation.

Trace mineral salt block (50 lbs/block) provided at all times.

Clean water is available at all times.

Copper bolus (copper oxide needles) as needed.

Original Approval Date: 2005

5.	CITY, STATE, ZIP Woodland Hills, CA 91371	5.	CITY, STATE, ZIP Woodland Hills, CA 91371
6.	PHONE # (818) 719-6497	6.	PHONE # (HOME) 818-621-3112

The attending veterinarian shall establish, maintain and supervise programs of disease control and prevention, pest and parasite control, pre-procedural care, nutrition, euthanasia, and adequate veterinary care for all animals on the premises of the licensee/registrant. A written program of adequate veterinary care between the licensee/registrant and the doctor of veterinary medicine shall be established and reviewed on an annual basis. By law, such programs must include regularly scheduled visits to the premises by the veterinarian. Scheduled visits are required to monitor animal health and husbandry.

Pages or blocks which do not apply to the facility should be marked N/A. If space provided is not adequate for a specific topic, additional sheets may be added. Please indicate Section and Item Number.

I have read and completed this Program of Veterinary Care, and understand my responsibilities.

Regularly scheduled visits by the veterinarian will occur at the following frequencies:

At least once yearly

A. VACCINATIONS - LIST THE DISEASES FOR WHICH VACCINATIONS ARE PERFORMED AND THE FREQUENCY OF VACCINATIONS (Enter N/A if not applicable)

HOOFED STOCK: GOATS

- 1) Clostridium perfringens type C and D, twice annually, SQ or IM per manufacturer
- 2) Tetani bacterin toxoid, twice annually, SQ or IM per manufacturer
- 3) Selenium supplement as needed.

If breeding, one of the two yearly vaccinations is administered 3-4 weeks prior to kidding. Kids are vaccinated with CDT at 2-3 months old, with boosters given one month later. In addition, Kids are given tetanus antitoxin at castration and tail docking.

B. PARASITE CONTROL PROGRAM - DESCRIBE THE FREQUENCY OF SAMPLING OR TREATMENT FOR THE FOLLOWING:

1. ECTOPARASITES (Fleas, Ticks, Mites, Lice, Flies):
Moxidectin po 0.4 mg/kg and/or dips, sprays, dusts as directed by veterinarian.
Carbaryl for chewing lice twice a year
Ivermectin for sucking lice
Atroban concentrate diluted into a spray.
2. BLOOD PARASITES: N/A
3. INTESTINAL PARASITES:
 - Fecal samples tested twice yearly
 - Deworming as needed for symptomatic animals:
 - Albendazole (Valbazen) po oral drench (**NOT when pregnant**) 5-10mg/kg
 - OR Fenbendazole (po 5 days for Nematodirus)
 - OR Ivermectin 0.2-0.3 mg/kg SQ or po
 - OR Moxidectin at 0.4 mg/kg
 - Booster follow-up 2 weeks after treatment

C. EMERGENCY CARE

1. DESCRIBE PROVISIONS FOR EMERGENCY, WEEKEND AND HOLIDAY CARE:

Farm staff provides animal care on weekends and holidays.

Only Administrators and Agriculture faculty are authorized to call a veterinarian onto the premises.

During work hours, emergencies should be reported to authorities in this order:

Farm Manager	(818) 719-6406
Program Veterinarian	(818) 710-4160
RVT Program Director	(818) 719-6497
Department Chair	(818) 719-6497

On weekends, holidays and non-work hours, emergencies should be reported to the Sheriff's Office, who will contact the above mentioned authorities in that order. Ag techs may contact the Farm Manager directly.

Sheriff's Office: (818) 719-6450

Veterinarians to call for Large Animal emergencies:

Dr. Giacopuzzi (805) 386-4291

Dr. Williams (661) 268-8128

2. DESCRIBE CAPTURE AND RESTRAINT METHOD(S)

- a. Manual restraint will be used.
- b. Halters may be used as needed.
- c. Chutes may be used as needed.
- d. Sedation may be administered as directed by the veterinarian.

D. EUTHANASIA

1. Sick, diseased, injured, or lame animals shall be provided with veterinary care, sold at commercial market, placed with a caregiver, or euthanized as determined by the veterinarian and farm manager. Euthanasia will be in accordance with the AVMA recommendations and will be carried out by the following:

VETERINARIAN ☒ X

RVT ☒ X

2. METHOD(S) OF EUTHANASIA:

Euthanasia solution 1ml/10lbs administered intravenously.

Option: Sedation may be administered prior to euthanasia injection.

E. OTHER:

Procedures shall be consolidated as much as possible to avoid stress to the goats.

1. Hooves shall be examined 4 times a year and trimmed as needed.
1. Physical exams shall be performed once a year.
2. Ear tags applied within 2 weeks of birth. A State identification tag will be applied.
3. Males may be elastrated at 2 days – 2 weeks.
 - a. Alternatively, surgical castration may be performed under anesthesia with proper pain control.

F. DIET:

- Goats are pasture-fed and supplemented daily with hay and alfalfa (when nursing). Quantity depending on pasture quality.
- Goats are fed hay twice daily in the morning and late afternoon when not on pasture.
- A protein supplement block may be provided (not required), but especially during lactation.
- Salt-mineral blocks are provided at all times.

- Clean water is available at all times.
- Grain is supplemented to does starting 2-4 weeks pre-partum to 8 weeks post-partum. Grain may be continued throughout lactation.
- Copper bolus (copper oxide needles) given twice yearly.

B. PARASITE CONTROL PROGRAM - DESCRIBE THE FREQUENCY OF SAMPLING OR TREATMENT FOR THE FOLLOWING:

1. ECTOPARASITES (Fleas, Ticks, Mites, Lice, Flies):
Pyrethrin based sprays or dips, as directed by veterinarian.
2. BLOOD PARASITES: N/A
3. INTESTINAL PARASITES:
 - Fecal samples tested 1-2 times yearly.
 - Deworming 4-6 times per year as follows:
 - Ivermectin 0.2 mg/Kg IM, oral paste, or oral solution
 - Moxidectin 0.4 mg/Kg PO
 - Fenbendazole; granules 5.1 mg/Kg PO; paste 5 mg/Kg PO; for *Parascaris equorum* 10 mg/Kg PO

C. EMERGENCY CARE

1. DESCRIBE PROVISIONS FOR EMERGENCY, WEEKEND AND HOLIDAY CARE:
Farm staff will provide routine care to horses on weekends and holidays. Emergency care will be provided by:

Humphrey, Giacomuzzi and Associates 805-386-4291
Jana Smith, DVM (805) 386-0240

2. DESCRIBE CAPTURE AND RESTRAINT METHOD(S)

- Halter and lead rope techniques will be used.
- Sedation and other restraint techniques may be administered as directed by the veterinarian.

D. EUTHANASIA

1. SICK, DISEASED, INJURED OR LAME ANIMALS SHALL BE PROVIDED WITH VETERINARY CARE OR EUTHANIZED. EUTHANASIA WILL BE IN ACCORDANCE WITH THE AVMA RECOMMENDATIONS AND WILL BE CARRIED OUT BY THE FOLLOWING:

VETERINARIAN ☒ X

RVT _____

2. METHOD(S) OF EUTHANASIA:

Euthanasia solution 1cc/10# IV

E. OTHER:

1. Hoof care shall be provided every 6-10 weeks based on the advice of the lead equine instructor or Program Veterinarian.
2. Physical exams will be performed once a year under the supervision of the Program Veterinarian.
3. Dental care shall be provided by a veterinarian 1-2 times per year as indicated.

F. DIET:

- Horses are fed twice daily in the early morning and late afternoon within industry standards with maintenance of normal weight and health, as determined by lead equine instructor and program veterinarian.
- An equine trace mineral/salt block is provided at all times.
- Water is available at all times.
