SUBJECT:

Annual Report Exception Summary

Registration Number: 93-R-0067 Customer ID Number: 1168

The Allergan Animal Care and Use Committee has approved under protocol 720-100607-2013, A Dry Age-Related Macular Degeneration Model in Rabbits, an exception to house rabbits in a 24 hour dark cycle for up to 3 consecutive days. The caging, feed and water is otherwise standard. The exception is a required component for development of the animal model. The animals involved are to be monitored daily according to our routine procedures. Due to changes in research priorities, no animals were actually used for this aspect of the study. The protocol has since been retired by the Principal Investigator and is no longer active.
