Re: Animal Welfare Assurance
A3693-01 [OLAW Case F]

Dr. Keith LeJeune
Senior Vice President for Research
And Innovation
Allegheny-Singer Research Institute
320 East North Avenue
Pittsburgh, PA 15212-4772

Dear Dr. LeJeune,

The Office of Laboratory Animal Welfare (OLAW) acknowledges receipt of your June 28, 2017 letter reporting a noncompliance with the PHS Policy on the Humane Care and Use of Laboratory Animals at the Allegheny Singer Research Institute. According to the information provided, it is understood that another AVMA-approved euthanasia method was used in place of the one in the IACUC-approved protocol "Neutrophil Modulation to Treat Type 1 Diabetes Mellitus" (1009). There were no animal welfare concerns. The activity was not PHS-supported.

Corrective actions included amending the protocol to add the euthanasia method. The PI and Research staff were also retrained in the areas of non-compliance. The staff will verify compliance with the protocol before conducting animal procedures.

OLAW believes that the corrective measures by the Allegheny Singer Research Institute are consistent with the provisions of the PHS Policy on Humane Care and Use of Laboratory Animals for institutional self-monitoring, self-correction, and self-reporting. Although this activity was not PHS funded, the application of the standards of the PHS Policy across the animal care and use program reduces any potential appearance of a double standard. We appreciate being informed of this matter and find no cause for further action by this office.

Sincerely,

Brent C. Morse, DVM
Acting Director
Division of Compliance Oversight
Office of Laboratory Animal Welfare

RE: **Funding Source:** [redacted] **Financial information**
Name of Institute: Allegheny Singer Research Institute
Assurance #: D16-00408 (A3693-01)
PI: Nick Giannoukakis, Ph.D.
IACUC Application: "Neutrophil Modulation to Treat Type 1 Diabetes Mellitus" (1009)

Dear Dr. Wolff,

This is letter to report non-compliance that occurred at Allegheny Singer Research Institute (Assurance #: A3693-01). The noncompliance consisted of a failure to adhere to the approved protocol which is a serious deviation as required by The Guide.

Upon internal quality assurance monitoring, it was found that the euthanasia method being conducted was not approved by the IACCU and another AVMA approved method of euthanasia was being. The IACUC has since approved the method of euthanasia through an amendment to the protocol and no animal welfare issues were present since the method was approved by the AVMA.

The Committee discussed this issue at the convened meeting on July 20, 2017. It was determined that no animals were harmed, an AVMA method of euthanasia was used, and the protocol was amended upon discovery of the discrepancy.

The IACUC discussed the incident and accepted the following corrective action plan (CAP) that was implemented:

- The PI and Research Staff received mandatory re-training in the areas of non-compliance
- Utilizing a verification step that prior to any planned procedures are conducted, the staff will ensure they are what is in the current protocol and that all individuals involved with animal research are aware of the approved procedures

If you have any questions, please do not hesitate to contact me.

Sincerely,

Keith LeJeune, PhD
SVP Research & Innovation
Institutional Official
