

LIBERTY RESEARCH, INC.

Subject: **2016-2017 List of IACUC Approved Studies Requiring Exercise Exemptions**

Date: 01 Nov 17

Liberty Research, Inc.'s (LRI) IACUC reviewed and approved that animals for the following studies be exempted from routine exercise outside of their cages. The basis for the requested exemption for study 16.0805.009 was to avoid cross-contamination through direct contact with other animals' feces in a common exercise area. Each animal's immune response to a challenge organism was being assessed and exposure to additional virus being shed by other animals was to be avoided. The basis for the requested exemption for study 17.0150.012 was to avoid cross-contamination of a topical test article through direct contact with other animals. The exemption was granted for the period of time as listed below.

<u>Study Number</u>	<u>Species</u>	<u>Number of Animals</u>	<u>Number of Days</u>
16.0805.009	canine	30	32
17.0150.012	feline	20	211
