MISCELLANEOUS.

According to facility records, February 11, 2016, personnel was unable to properly intubate a 1 day old piglet (# 3051). The animal sustained injuries and ultimately succumbed. The animal's condition was assessed and measures were taken to relieve any pain and/or distress.

As per 2.38 (f) (1), handling of all animals shall be done as expeditiously and carefully as possible in a manner that does not cause trauma, behavioral stress, physical harm, or unnecessary discomfort.

The research facility acted to address this item by conducting a thorough review and further implementing appropriate corrective actions to prevent any future incidents. There have not been any additional incidents since the corrective actions were implemented.

Inspection was conducted at both the Center City Campus and Queens Lane Campus.

Inspection was conducted on March 14-March 15, 2016.

An exit interview was conducted with Dr. Ashley McIntosh (VMO) and facility representative on March 15, 2016.

An electronic and hard copy of the report was submitted to facility representatives on March 18, 2016.
