IACUC Approved Exception Report [32-R-0009]

Two protocols are approved for prolonged restraint involving the use of farrowing crates for sows. The farrowing crates are needed to help ensure the safety of the piglets. Each protocol provides scientific justification necessitating the use of the farrowing crate.

1. Study 10449- This study is approved for the use of the farrowing crate. Ten swine were exposed to the crate on this protocol during the reporting period.
2. Study 10448- This study is approved for the use of the farrowing crate. There were no swine exposed to the crate on this protocol during the reporting period.
